Preface

English Pronunciation Made Simple is designed to help students develop pronunciation skills and overcome pronunciation problems when speaking English. We understand how frustrating it is to have someone say, "I can't understand you because of your accent." We know that students of English as a second language may be afraid to use certain words because they are difficult to pronounce. Many students avoid words like *rice* and *berry*, for instance. *English Pronunciation Made Simple* gives students the fundamental understanding of pronunciation—and the confidence they need—so they no longer have to avoid certain words and phrases. Most important, students *don't* have to be misunderstood by other people.

English Pronunciation Made Simple can be used either as a classroom textbook or as a comprehensive program for self-study. It is organized so that any academic schedule can be accommodated, making it ideal for use as a course textbook. However, *English Pronunciation Made Simple* may also be used independently, by students who want to be better understood in English. Presented in clear, easy-to-understand terms, the material in this book is accompanied by an audio program that enables students to maximize their learning outside of the classroom.

English Pronunciation Made Simple is divided into three parts—Part 1: Vowels, Part 2: Stress, Rhythm, and Intonation, and Part 3: Consonants. Each part contains a series of brief lessons, and each lesson presents one or two specific pronunciation points.

Vowel Lessons and Consonant Lessons

The vowel and consonant lessons (Parts 1 and 3) follow a consistent format and are designed to provide both clear, accessible presentations of pronunciation points and ample practice. Each lesson includes:

- **Pronouncing the Sound** A simple explanation of how to pronounce the sound, with mouth drawings that show how to use the articulators (lips, tongue, etc.) for each sound.
- **Possible Pronunciation Problems** An explanation of how and why the sound may create problems for students.
- **Hints** Rules to help students remember when to produce the target sound, which emphasize the recognition of English spelling patterns as a guide to pronunciation. (NOTE: Not every lesson includes a hint.)
- **Exercises** A comprehensive wealth of productive practice opportunities using the sound as it occurs in words, common phrases, and sentences.

- **More Practice** A variety of listening, reading, and communicative conversational activities that reflect how the sound is heard and used in daily life. At least one activity in this section is productive.
- **Check Yourself** Additional activities designed to help students recognize and evaluate their progress. Answers to all *Check Yourself* exercises are provided in Appendix II.

Stress, Rhythm, and Intonation Lessons

The lessons in Part 2 expose students to the stress, rhythm, and intonation of American English and focus on helping students hear and produce natural-sounding language beyond the word level. Students work on common phrases, sentences, and pieces of more extended discourse.

The audio CDs that are packaged with this book contain the *Check Yourself* listenings. In addition, a classroom audio program available on both CDs and cassettes includes the listenings for these sections as well as for the exercises for each lesson. This classroom audio program also provides models of correct pronunciation for each sound presented.

To the Student

Welcome to *English Pronunciation Made Simple*! Before we begin, let's look at the term "foreign accent" in general. The *Longman Dictionary of American English* defines *accent* as "a way of speaking that someone has because of where s/he was born or lives." So the truth is, we *all* have accents! In fact, you should be proud that you speak English with an accent. A "foreign" accent tells people that you speak at least two languages. And the world would be very dull if we all sounded the same.

Unfortunately, the disadvantage to having a "foreign" accent is that it may hinder effective communication in your nonnative language and cause you to be misunderstood. Our main goal is to help you improve your pronunciation of North American English. This will enable you to communicate clearly what you want to say. Frequent practice and review is important. We suggest practice sessions at least three or four times a week, even if you can only manage 20 or 30 minutes each session. We know this is hard work. Take breaks when you get tired. Improvement takes time, but little by little, you will succeed.

If you live or work among English speakers, you will quickly find ways to apply what you learn in *English Pronunciation Made Simple* to situations outside of class. But even if you live in a non-English-speaking environment, you should try to get as much practice as possible in applying the material in the book. Here are some things you can do to reinforce what you are learning.

- Watch English language news on TV as often as you can. Pay careful attention to the newscaster's pronunciation. Notice especially words and phrases that are repeated every time you watch. Practice saying them. Write them down. Compare your pronunciation with the newscaster's.
- Listen to radio news stations for 5 to 10 minutes at a time. Repeat common words and phrases after the announcer.
- When one of your favorite English language TV shows is on, try to understand the dialogue without watching. Or try this with commercials: See if you can tell what is being advertised without looking.
- Whenever you have the opportunity to converse with a North American English speaker, use it! Try to include common expressions presented in this book, such as "See you this evening" or "Pleased to meet you."
- Ask your listener if your pronunciation of a specific word is correct. Most listeners will be glad to help.

Part 1 Vowels

Although *English Pronunciation Made Simple* emphasizes pronunciation, it can also help you increase your vocabulary. When you don't understand a word or idiom, look it up in your dictionary. (We recommend the *Longman Dictionary of American English*.) Write the definition down so you won't forget it.

Using *English Pronunciation Made Simple* on Your Own

If you are using these materials for self-study, you will probably want to own the entire set of classroom CDs or cassettes, so you can get the most from the comprehensive program. To get the greatest benefit, follow these simple suggestions:

- **Exercises** Go to the appropriate exercise in the audio program. Read the directions. Listen. Repeat words or phrases during the pauses. Stop and go back whenever you like. If you have difficulty at any time, stop and reread the directions for pronouncing the sound. Look in a mirror as you say the sound to be sure that your articulators (tongue, lips, and so on) are in the correct position. Use the drawing in the book to check this. Repeat the exercise until you can say the sounds, words, phrases, or sentences easily. When you are able to repeat the material without looking at the book, you are ready to move on.
- **More Practice** When you are satisfied with your pronunciation of the target sound in the exercises, you are ready to apply what you have learned to content and situations similar to those you might encounter in real life. "More Practice provides controlled practice with this. Be aware of situations in your daily life that provide parallel practice. Have fun recognizing and producing the sound in other poems, readings, and conversations, and try to find other ways to incorporate what you have learned in your daily encounters with English.
- **Check Yourself** Do not be discouraged if you make some mistakes in this section. The purpose of the Check Yourself section is to help you measure your progress and to identify areas that still need work. The instructions for each Check Yourself exercise are different. Read all directions carefully before beginning. When you finish a test, check your answers in Appendix II. If you have difficulty with an exercise, return to the beginning of the lesson and repeat the activities in More Practice. The dialogues and paragraphs are the most difficult activities in each lesson. Review them often as you progress through the book.

You may wonder how long it will take before you see improvement. We believe that improvement depends on practice—and *English Pronunciation Made Simple* provides all the tools you need to practice often. We hope you find it makes a difference in a matter of weeks!

Part 1 Vowels

Lesson 1

Pronouncing the Vowels of American English

You have probably discovered that there is a big difference between the way words are spelled in English and the way they are pronounced. English spelling patterns are inconsistent and are not always a reliable guide to pronunciation. For example, in the following words, the letter *a* is used to represent five different sounds.

hate father have any saw

Pretty confusing, right? That's why we need a set of symbols in which *each* sound is represented by a *different* symbol. In this book, you will see symbols used. These are the International Phonetic Alphabet (IPA), which is used all over the world. It consists of a set of symbols in which *one symbol* represents *one sound*.

DON'T PANIC! It is not necessary to learn all the symbols at once. Each sound will be introduced and explained one at a time. You will learn the symbols easily as you progress through the book. A pronunciation key to the different vowels and diphthongs of American English with their IPA symbols is presented below. Refer to it as needed.

To help you understand the exact pronunciation of the phonetic symbols and key words, the Key to Pronouncing the Vowels of American English is included in the audio program. You will hear each phonetic symbol introduced and pronounced once. Each English key word will be said once.

SECTION 2	[u]	you, too, rule
	[ʊ]	put, cook
	[ʌ]	up, but, come
	[oʊ]	boat, no, oh
	[ɔ]	all, boss, caught

Definitions

As you progress through *English Pronunciation Made Simple*, you will frequently see the terms *articulators*, *vowels*, and *diphthongs*. We will now define these terms for you.

Articulators: The articulators are the different parts of the mouth area that we use when speaking, such as the lips, tongue, teeth, and jaw.

Vowel: A vowel is a speech sound produced with vibrating vocal cords and a continuous unrestricted flow of air coming from the mouth. The most well-known vowels in English are:

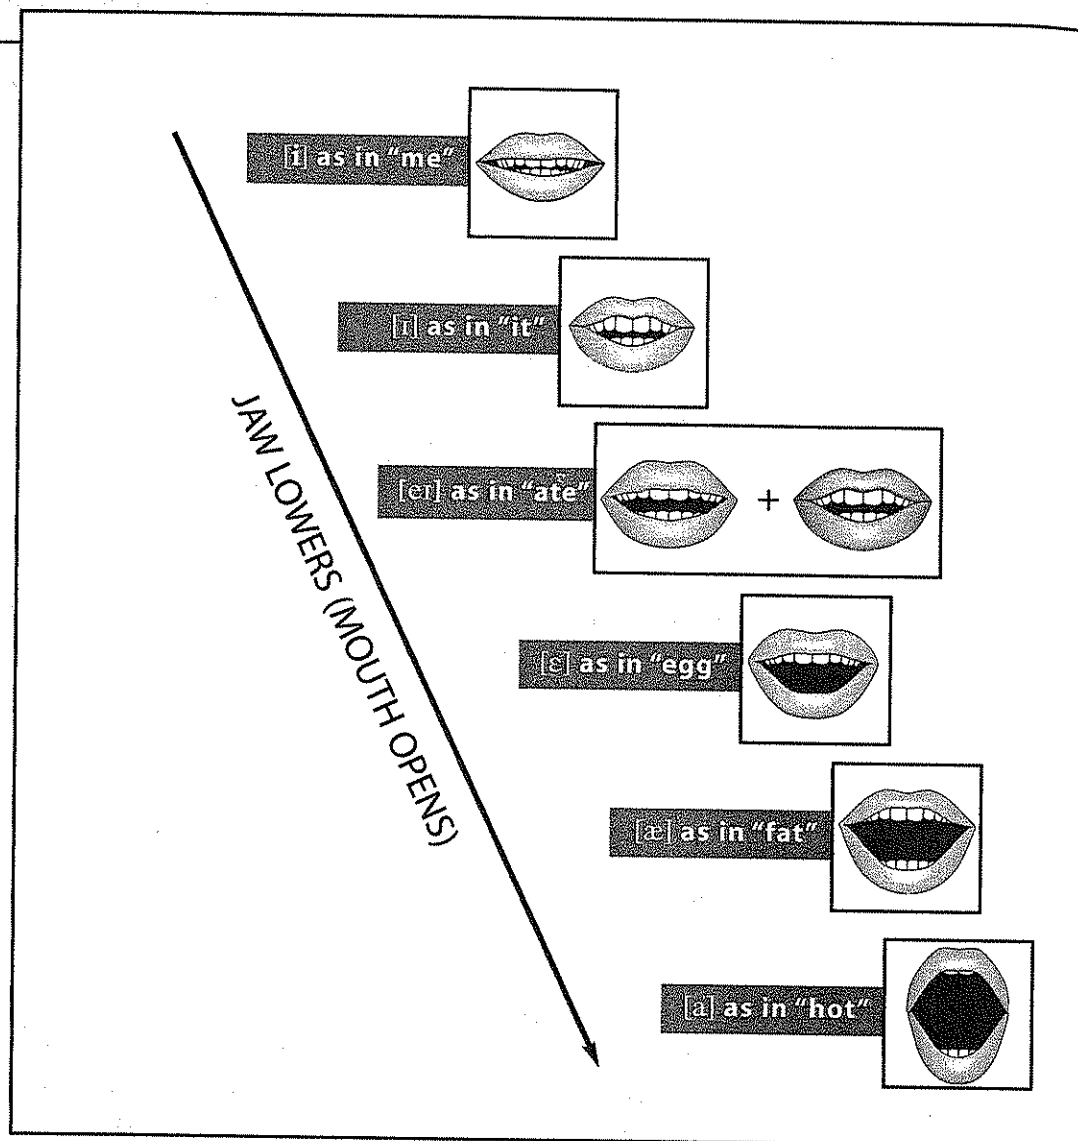

A E I O U

The various vowel sounds are affected by the changing shape and position of your articulators. The different vowels are created by:

1. **The position of your tongue in the mouth.** For example, the tongue is high in the mouth for the vowel [i] as in "see," but is low in the mouth for the vowel [a] as in "hot."
2. **The shape of your lips.** For example, the lips are very rounded for the vowel [u] as in "new," but are spread for [i] as in "see."
3. **The size of your jaw opening.** For example, the jaw is open much wider for [a] as in "hot" than it is for the diphthong [eɪ] as in "pay."

Diphthong: A diphthong is a combination of two vowel sounds. It begins as one vowel and ends as another. During the production of a diphthong, your articulators glide from the position of the first vowel to the position of the second. For example, when pronouncing [eɪ] as in "vein," your articulators glide from the vowel [e] to the vowel [ɪ]. In English, the most common diphthongs are [aʊ], [eɪ], [aɪ], [ɔɪ], and [oʊ].

PRONOUNCING FRONT VOWELS

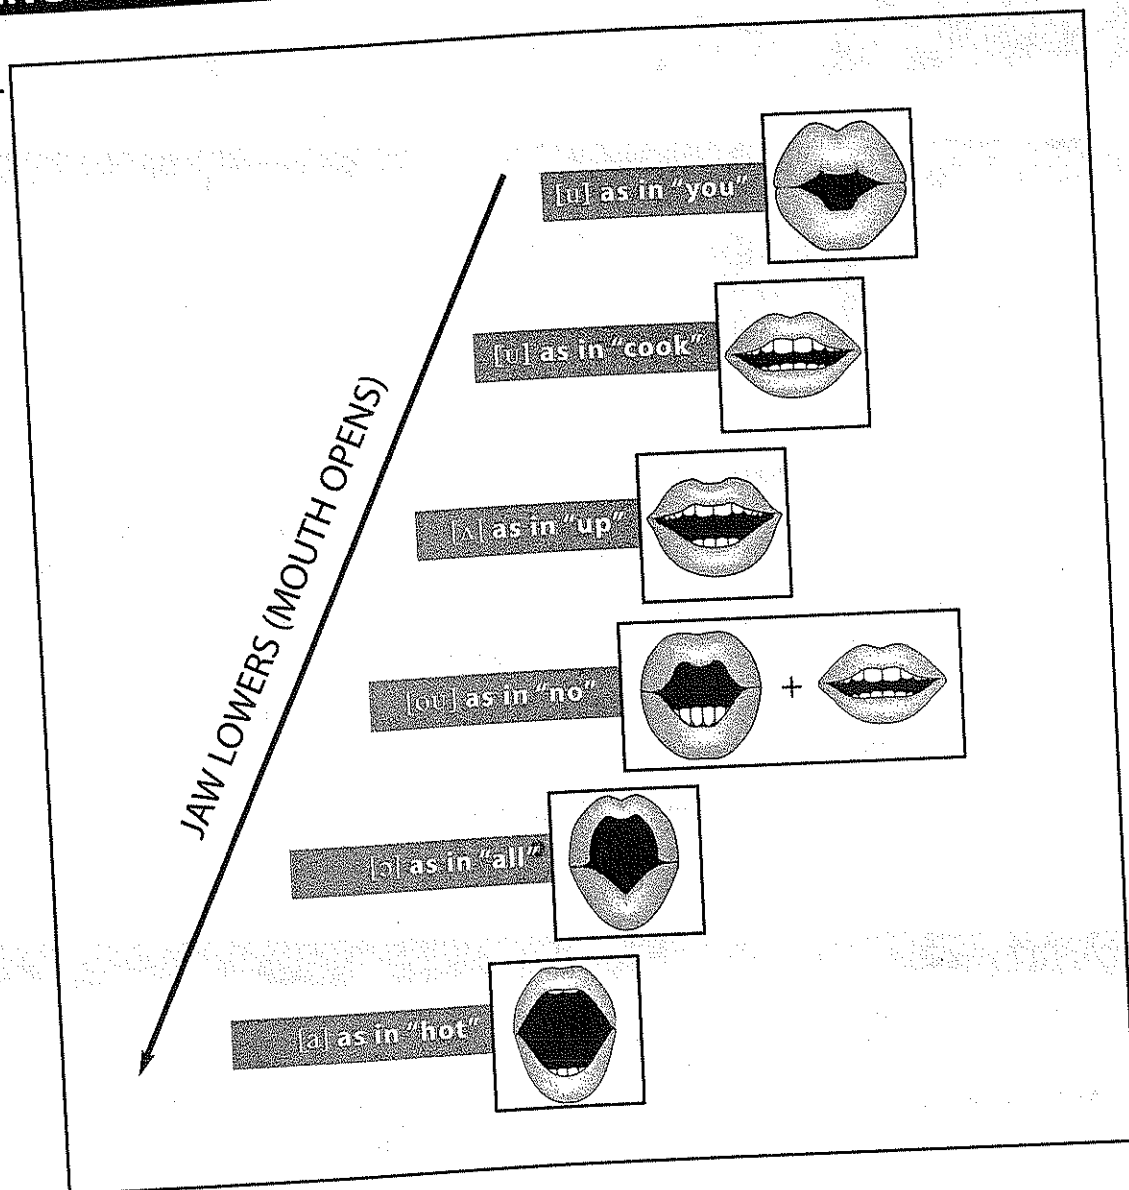

You can see in the pictures how the jaw moves from a closed position to an open one during pronunciation of the vowel sequence [i], [ɪ], [eɪ], [ɛ], [æ], [a].

Becoming familiar with this progression and understanding the relationship of one vowel to another will help you with your pronunciation of the vowels.

- The phonetic symbol [ɪ] represents a sound between [i] and [eɪ]. It is pronounced with the jaw and tongue raised more than for [eɪ], but not as much as for [i].
- The symbol [æ] represents a sound between [ɛ] and [a]. [æ] is pronounced with the jaw open more than for [ɛ] but not as much as for [a].

Refer to these pictures whenever you have difficulty pronouncing any of the vowels. Repeat the sequence [i], [ɪ], [eɪ], [ɛ], [æ], [a] several times. Notice the progressive dropping of your tongue and jaw as you pronounce each sound.

PRONOUNCING BACK VOWELS

Once again you can see how the jaw moves from a closed position to an open one during the pronunciation of a vowel sequence. Practice pronouncing the series several times. Place your hand under your chin and feel your jaw drop with the pronunciation of each vowel.

Refer to these pictures whenever you are confused about the pronunciation of any of the vowels. Repeat the sequence [u], [ʊ], [ʌ], [oʊ], [ɔ], [ɑ] several times. You'll be able to see and feel your jaw lower as you pronounce the vowels in the series. TRY IT NOW! IT REALLY WORKS!

Lesson 2

[i] as in *me, tea, and bee*
and [ɪ] as in *it and pin*

PRONOUNCING [i]

[i]

Lips: Tense and in a "smile" position

Jaw: Almost completely raised

Tongue: High, near the roof of the mouth

Possible Pronunciation Problems

Pronunciation problems occur because of confusing English spelling patterns and the similarity of [i] and [ɪ] (the sound to be described next).

EXAMPLES If you say [ɪ] instead of [i]: **sheep** will sound like **ship**.
eat will sound like **it**.

Remember to feel tension in your lips, tongue, and jaw. [i] is a *long* sound; be sure to prolong it.

Smile when you say [i]; we *guarantee* it's *easy* to say [i]!

Practice

EXERCISE A

Listen and repeat.

[i] At the Beginning of Words

eat	each	eager
eel	even	either
east	equal	
easy	eagle	

[i] In the Middle of Words

mean	seal	please
need	leave	police
keep	reach	
deep	scene	

[i] At the End of Words

he	fee	she
be	tree	agree
key	knee	
tea	free	

[i] Spelled

<i>e</i>	<i>ee</i>	<i>ea</i>	<i>ie</i> or <i>ie</i>
he	see	east	niece
we	feel	lean	brief
me	deed	team	piece
scene	heel	cheap	belief
these	need	peach	either

note

Less frequent spelling patterns for [i] consist of the letters *i* and *eo*.

police people

EXERCISE B

Listen and repeat. The vowel [i] is prolonged before consonants. (Consonants are all the sounds that are not vowels.) The dots are there to remind you to lengthen the [i].

fee	fee . . . d
see	see . . . d
pea	pea . . . s
bee	bee . . . s
tea	tea . . . m

EXERCISE C

Listen and repeat. The boldfaced words in the following sentences all include the vowel [i].

1. See you at **three**.
2. **See** what I **mean**?
3. **See** you next **week**.
4. **See** you this **evening**.
5. **Pleased** to **meet** you.
6. **Steve** **eats** **cream** **cheese**.
7. **Lee** has a **reason** for **leaving**.
8. **She** **received** her **teaching** **degree**.
9. A friend in **need** is a friend **indeed**.
10. They **reached** a **peace** **agreement**.

CHECK YOURSELF

Listen and repeat. Circle the word in each group that does NOT contain the vowel [i]. (For answers, see Appendix II, page 271.)

EXAMPLE	keep	lean	fit	piece
1. bead	great	leave	tea	
2. eight	piece	believe	niece	
3. scene	women	these	even	
4. need	been	sleep	thirteen	
5. police	thief	machine	vision	
6. pretty	wheat	sweet	cream	
7. people	bread	deal	east	
8. tin	teen	steam	receive	
9. leave	live	leaf	lease	
10. steep	Steve	easy	still	

More Practice

EXERCISE A

Read aloud the paragraph about the Beatles. All the boldfaced words should be pronounced with the vowel [i].

The Beatles

What is a **Beatle**? **Maybe** you think of a **real creature** who **creeps** and **leaps** about. But most **people** recall four English **teens** called the **Beatles**, who appeared as a rock group in the **nineteen sixties**. **Leaving** **bebop** behind, the **Beatles** created a **unique beat** that **appealed** to everyone. **Seen** on American **TV**, they were **greeted** by **screams** and **cheers**. "**Please Please Me**" and "**She Loves You**" were among their **many pieces**. They **even received** an award from the **queen** of England. The **team** broke up as they **reached** their **peak**, but **each** member continued his own **career**. The world **grieved** the loss of their **leader**, John Lennon, who died in December **1980**. Although only **briefly** on the **scene**, the **Beatles** created **meaningful** music that will **be** here for an **eternity**.

EXERCISE B

Think of five things you need to do. Be sure your response contains many [i] words. When you complete your responses, choose any classmate and ask the question, "What do you really need?"

EXAMPLES I really need to feed my parakeet.
I really need a new key.

PRONOUNCING [i]

Lips: Relaxed and slightly parted

Jaw: Slightly lower than for [i]

Tongue: High, but lower than for [i]

Possible Pronunciation Problems

The vowel [i] may be difficult for you to recognize and say. Some learners substitute the more familiar [ɪ] sound. This can result in miscommunication.

EXAMPLES If you say [ɪ] instead of [i]: **hit** will sound like **heat**.
itch will sound like **each**.

As you practice the exercises, remember not to "smile" and tense your lips as you would for [i].

[i] is a short, quick sound; your lips should barely move as you say it!

Practice

EXERCISE A

 Listen and repeat.

[ɪ] At the Beginning of Words

is	if	it
ill	itch	into
ink	inch	issue
instant		

[ɪ] In the Middle of Words

pin	lift	give
miss	simple	winter
listen	timid	minute
little		

The vowel [ɪ] does not occur at the end of words in English.

[ɪ] Spelled

y	ui	i
gym	build	sin
syrup	quick	lips
symbol	quilt	with
system	guilty	gift
rhythm	guitar	differ

note

The most common spelling pattern for [ɪ] is the letter *i* followed by a final consonant.

win this hit trip begin

Less frequent spelling patterns for [ɪ] consist of the letters *o*, *e*, *u*, and *ee*.

women pretty busy been

EXERCISE B

 Listen and repeat. The boldfaced words in the following sentences all contain the vowel [ɪ].

1. **This** is it.
2. What **is** **this**?
3. **This** is my **sister**.
4. **This** is Miss **Smith**.
5. **This** is **big** **business**.
6. I will **sit** in a **minute**.
7. **Give** the **list** to **Lynn**.
8. My **little** **sister** is **timid**.
9. Is the **building** **finished**?
10. **Did** you **give** him his **gift**?

CHECK YOURSELF

Listen to the words. Circle the number of the word with the vowel [ɪ].
(For answers, see Appendix II, page 271.)

EXAMPLE You hear mitt meat meat
You circle ① 2 3

Lesson 8

PRONOUNCING [u]

[u]

Lips: Tense and in a "whistling" position

Jaw: Almost completely raised

Tongue: High, near the roof of the mouth

Possible Pronunciation Problems

Pronunciation problems occur because of confusing English spelling patterns and the similarity of [u] and [ʊ] (the sound to be discussed next).

EXAMPLES When you substitute [ʊ] for [u]: **pool** becomes **pull**.
suit becomes **soot**.

Your lips should be tense and in a "whistling" position when you say [u]. [u] is a *long* sound; be sure to *prolong* it.

You can do it! If you remember to protrude your lips when producing [u], you'll never confuse "pull" with "pool"!

However, he was truthful and stated that his tricks could be understood by all humans! Houdini is an idol for all would-be magicians.

Lucy: Are ^[u]you ^[u]pulling my leg? This is ^[u]too ^[u]good to be ^[u]true. Well, I'm ^[u]no ^[u]fool. ^[u]Who says a ^[u]woman ^[u]should leave her ^[u]good-looking husband alone? ^[u]Put us down for ^[u]two. ^[u]Drew and I will ^[u]cruise the ^[u]beautiful ^[u]Blue Danube in ^[u]June!

PRONOUNCING [ʌ]

Lips: Relaxed and slightly parted

Jaw: Relaxed and slightly lowered

 If you say [ou] instead of [ʌ]: **come** will sound like **comb**.
 If you say [ɔ] instead of [ʌ]: **done** will sound like **dawn**.

Lesson 10 [OU] as in *oh*, *no*, and *boat*

PRONOUNCING [OU]

Lips: Tense and very rounded

Jaw: Rises with the tongue and closes slightly

Tongue: Glides from midlevel to near the roof of the mouth

[ou] is a diphthong. A diphthong is a compound vowel sound made by blending two vowels together very quickly. The diphthong [ou] begins with [o] and ends with [u].

Possible Pronunciation Problems

Once again, your pronunciation problems with this sound occur because of confusing English spelling patterns and similarities with other vowel sounds.

EXAMPLES If you say [ʌ] instead of [ou]: **coat** will sound like **cut**.
 If you say [ɔ] instead of [ou]: **bold** will sound like **bald**.
 If you say [a] instead of [ou]: **note** will sound like **not**.

When producing the diphthong [ou], round your lips into the shape of the letter *o*. [ou] is a long sound; be sure to prolong it.

Listen and practice and know your [ou] will be OK!

Lesson 13 [ə] as in *a, upon, and soda*

PRONOUNCING [ə]

The schwa vowel [ə] is a very short, quick sound. Your lips should be completely relaxed and barely move during its production.

[ə] is the sound that results when ANY vowel in English is unstressed in a word. The vowels in all unstressed syllables almost always sound like [ə]. Any letter or combination of letters can represent the schwa [ə].

Possible Pronunciation Problems

In most languages, vowels are pronounced clearly and distinctly. The schwa [ə] does not exist. In English, unstressed vowels should receive much less force than other vowels in the word. In order to speak fluent English, you must unstress or reduce any vowels that are NOT in accented syllables of words. Vowel reduction to [ə] is not sloppy speech. It is an important feature of spoken English.

Practice

EXERCISE A

 Listen and repeat. Notice how the syllable with the [ə] vowel receives less stress than the other syllables in the word.

EXERCISE A

 Read aloud the verses from the poem "Annabel Lee," by Edgar Allen Poe. Remember, the underlined schwa [ə] vowels receive less stress than other vowels.

from "Annabel Lee"

Edgar Allen Poe

It was many and many a year ago in a kingdom by the sea
That a maiden there lived whom you may know
By the name of Annabel Lee,
And this maiden she lived with no other thought
Than to love and be loved by me.

I was a child and she was a child, in this kingdom by the sea
But we loved with a love that was more than love
I and my Annabel Lee,
With a love that the winged seraphs of heaven coveted her and me.

And this was the reason that long ago, in this kingdom by the sea,
 A wind blew out of a cloud, chilling my beautiful Annabel Lee,
 So that her highborn kinsman came and bore her away from me,
 To shut her up in a sepulchre in this kingdom by the sea.

And neither the angels in heaven above
 Nor the demons down under the sea,
 Can ever dissever my soul from the soul
 Of the beautiful Annabel Lee.

Read the following paragraph about pearls carefully. Underline words pronounced with [ɜː], and circle words pronounced with [ə].

Pearls

The pearl is one of the world's most treasured gems. Pearls are formed inside the shells of oysters. The largest pearl fisheries are in Asia. Cultured pearls were developed by the Chinese in the twentieth century. They are larger than nature's pearls. A perfect pearl that is round and has great luster is worth a lot of money. Perhaps "diamonds are a girl's best friend," but pearls will always win a woman's favor!

Mr. Brown: I didn't hear a sound. I was out like a light!

Mrs. Brown: Our neighbors had a big crowd; they were shouting and howling!

Mr. Brown: Why didn't you tell them to stop clowning around?

Mrs. Brown: I didn't want to sound like a grouch.

Mr. Brown: Next time I'll go out. I'm not afraid to open my mouth.

Mrs. Brown: I knew I could count on you. Here comes our noisy neighbor,
Mr. Crowley, right now.

Mr. Brown: Sorry, dear, I have to go downtown, NOW!

Mrs. Brown: Come back, you coward!

Part 2

**Stress, Rhythm,
and Intonation**

Lesson 18 Introducing Stress, Rhythm, and Intonation

Thus far, you have been studying the individual sounds of English. The sounds can be significantly affected by vocal features known as stress, rhythm, and intonation. These vocal features help to convey meaning and must be used correctly if you are to be completely understood.

Stress is the first vocal feature we will deal with. Speakers must stress certain syllables in words; otherwise the words would be misunderstood or sound strange. For example, improperly placed stress when pronouncing *invalid* (a chronically ill or disabled person) may make it sound like *invalid* (null; legally ineffective). Stress can also change the meaning of a sentence. "I saw a movie" is different from "I saw a **movie**." "**He** won't go" implies a meaning different from "He won't **go**." In English, proper use of stress enables you to clearly understand the difference between such words as the noun *present* (a gift) and the verb *present* (to introduce; to offer).

Rhythm is the second feature we will present. Rhythm is created by the strong stresses or beats in a sentence. In many languages, the rhythm is syllable-timed. This means that all vowels in all syllables are pronounced almost equally. Syllables are rarely lost or reduced as they are in English. For example, a three-word phrase in your language is not likely to become two words. In English, "ham and eggs" is squeezed into two words, "ham'n eggs."

This reduction results because English has a stress-timed rhythm. This means that its rhythm is determined by the number of stresses, not by the number of syllables. English speakers slow down and emphasize heavily stressed words or syllables. They speed up and reduce unstressed ones. For example, the five-word phrase "I will see you tomorrow" may become "I'll seeya t'morrow."

Intonation is the final vocal feature you will learn about. Intonation patterns involve pitch and are responsible for the melody of the language. Speakers frequently depend more on intonation patterns to convey their meaning than on the pronunciation of the individual vowels and consonants. For example, in English, the same words can be used to make a statement or ask a question. If your vocal intonation rises, you are asking a question: "He speaks English?" The sentence "That's Bill's car" becomes the question "That's Bill's car?" when you raise the pitch of your voice at the end.

So now you can appreciate the common expression, "It's not **what** you say, it's **how** you say it!"

Although your English grammar might be perfect and you might be able to pronounce individual sounds correctly, you will still have a noticeable foreign accent until you master the stress, rhythm, and intonation patterns of English.

Lesson 19 Stress Within the Word

Definition

Stress refers to the amount of volume that a speaker gives to a particular sound, syllable, or word while saying it. Stressed sounds and syllables are **louder** and **longer** than unstressed ones. The words *accent*, *stress*, and *emphasis* are frequently used interchangeably.

Stress in English

A major characteristic of the English language is the use of strong and weak stress. Every word of more than one syllable has a syllable that is emphasized more than the others. Accented syllables receive more force and are **louder** than unaccented ones. Correct use of stress is essential for achieving proper pronunciation of words.

Possible Pronunciation Problems

Many languages have specific rules for accenting words. When there is an exception to the rule, an accent mark is generally written above the stressed syllable. There are NO consistent rules in English. Consequently, you may have difficulty when attempting to accent syllables correctly.

1. If you place the stress on the **wrong** syllable:

EXAMPLES **désert** (dry barren region) will sound like **dessért** (sweet foods)
 ínvalid (bedridden/ill person) will sound like **inválid** (void, null)

2. If you stress every vowel in a word equally and forget to reduce vowels in unaccented syllables:

EXAMPLES **tomórrrow** will sound like **tómórrów**
 becáuse will sound like **bécaúse**

As you practice imitating your teacher or the instructor on the CD, your ability to use proper stress patterns when speaking English will improve. **BE POSITIVE AND KEEP PRACTICING!**

Words Stressed on the First Syllable

1. The majority of two-syllable words are accented on the **FIRST** syllable.

EXAMPLES **Túesday** **áwful** **éver** **bróther** **óven** **wíndow**

2. Compound nouns are usually accented on the FIRST syllable.

EXAMPLES bédroom stóplight schoóthouse bóokstore

3. Numbers that are multiples of ten are accented on the FIRST syllable.

EXAMPLES twéntry thírty fórtý fífty síxty sévnty

Words Stressed on the Second Syllable

1. Reflexive pronouns are usually accented on the SECOND syllable.

EXAMPLES mysélf yoursélf himsélf hersélf ourséives

2. Compound verbs are usually accented on the SECOND or LAST syllable.

EXAMPLES outdóne outsmárt outdó outrún overlook

Practice

Stress in Noun / Verb Homographs

There are many two-syllable nouns and verbs that are the same in the written form. We can distinguish between these word pairs in their spoken form through the use of stress. In these pairs, the noun will always be stressed on the first syllable and the verb on the second syllable.

2. When the syllable *re* begins a word, and it doesn't mean "again," it is unstressed.

EXAMPLES remárk redeém remínd rewárd requíre

EXERCISE E

Sentence Stress in English

You have already learned that word stress is a major feature of English. Stress patterns go beyond the word level. Just as it sounds awkward to stress the syllables in a word incorrectly or to stress them all equally, it sounds unnatural to stress all the words in a sentence equally or improperly. Effective use of strong and weak emphasis in phrases and sentences will help you achieve your goal of sounding like a native English speaker.

Possible Pronunciation Problems

English sentence-level stress patterns may not be used the same way as in your language. In English, specific words within a sentence are emphasized or spoken louder to make them stand out. ("It's not **his** house; it's **her** house.") Your language may use its grammar instead of word stress to convey the same meaning. Consequently, you may be confused about when to use strong stress (and when not to use it!) in English sentences. Using the stress patterns of your native language when speaking English will contribute to your foreign accent.

1. If you place the stress on the wrong word, you will:

a. completely change the meaning of your statement.

EXAMPLE

"He lives in the green **house**" (the house painted green) will sound like
"He lives in the **greenhouse**" (where plants are grown).

b. distort your intended meaning of the sentence.

EXAMPLE

"**Steve's** my cousin" (not Sam) will sound like
"Steve's my **cousin**" (not my brother).

2. If you give too much or equal stress to unimportant or "function words":

EXAMPLES

"I'm in the **house**" will sound like "I'm **in the** house."
"He's at the **store**" will sound like "**He's at the** store."

After reading the explanations and listening to the CD a few times, you will begin to understand the use of English sentence stress patterns. YOU SHOULD BE VERY PROUD OF YOURSELF. YOU'VE ALREADY COME A LONG WAY!

Words Generally Stressed in Sentences: Content Words

Content words are the important words in a sentence that convey meaning. We normally STRESS content words when speaking. Content words include all the major parts of speech such as nouns, verbs, adjectives, adverbs, and question words.

Words Generally Unstressed in Sentences: Function Words

Function words are the unimportant words in a sentence. They don't carry as much meaning as content words. We normally do NOT stress function words when speaking. Function words include the following parts of speech:

	Examples
1. Articles	<i>the, a</i>
2. Prepositions	<i>for, of, in, to</i>
3. Pronouns	<i>I, her, him, he, she, you</i>
4. Conjunctions	<i>but, as, and</i>
5. Helping verbs	<i>is, was, are, were, has, can</i>

Practice

EXERCISE A

Listen and repeat the common expressions. Be sure to stress the content words, NOT the function words.

1. sooner or later
2. in a moment
3. an apple a day
4. to tell the truth
5. as soft as a kitten
6. Silence is golden.
7. Honesty is the best policy.
8. Truth is stranger than fiction.
9. A penny saved is a penny earned.
10. To err is human; to forgive is divine.

Stressing Words to Clarify or Change Meaning

Sometimes a speaker wants his or her sentence to convey a special meaning that it wouldn't have in the written form. This can be done by stressing a specific word in order to call attention to it. The word that receives the stress depends on the personal motive of the speaker.

EXAMPLES I **bought** ten ties. (I wasn't *given* the ties; I *bought* them.)
I bought ten **ties**. (I didn't buy *shirts*; I bought *ties*.)

EXERCISE B

Listen and repeat the questions and responses. The boldfaced words should receive more emphasis than the other words.

| 1. Who likes candy? | Sam likes candy. |
| 2. What does Sam like? | Sam likes candy . |

Stress in Adjective/Noun Combinations

When you speak, it's important to use words that describe what you are talking about. Words that describe nouns (people, places, or things) are called adjectives. When you use adjective/noun combinations, the noun normally receives greater stress.

EXAMPLES big **dog** good **book** pretty **dress** nice **boy**

By accidentally stressing the adjective, you might mistakenly say a compound noun with a completely different meaning. Your listeners will be confused!

EXAMPLES cheap **skates** (inexpensive skates) will sound like **cheapskates** (stingy people)
yellow **jacket** (a yellow coat) will sound like **yellowjacket** (a stinging insect)

EXERCISE C

 **Listen and repeat the sentences. Be sure to stress only the boldfaced words or syllables.**

Sentences with Adjective/ Noun Combinations

I like all *blue* **birds**.
We live in the *white* **house**.
I don't like *dark* **rooms**.
He sawed a *black* **board**.
I don't like the *green* **house**.

Sentences with Compound Nouns

I like *blue***jays** and *blue***birds**.
The president lives in the *White* **House**.
Photographers work in *dark***rooms**.
The teacher writes on the *black***board**.
Plants grow in the *green***house**.

EXERCISE D

 **Listen to the dialogue. Pay careful attention to the sentence stress patterns used.**

John: Anna, who was on the **phone**?
Anna: My old friend **Mary**.
John: Mary **Jones**?
Anna: No. Mary **Hall**.
John: I don't know Mary **Hall**. Where is she **from**?
Anna: She's from **Washington**.
John: Washington the **state** or Washington the **city**?
Anna: Washington, **D.C.**, our nation's **capital**.
John: Is that where she **lives**?

Anna: Yes, she still lives in the white **house**.

John: The **White House**? With the **president**?

Anna: No, **silly**. The white **house** on **First Street**.

John: What did she **want**?

Anna: She wants to **come** here.

John: Come **here**? **When**?

Anna: In a **week**. She's bringing her black **bird**, her **collie**, her **snakes**, her . . .

John: **Stop!** She's bringing a **zoo** to **our** house?

Anna: No, John. She's opening a **pet** store here in **town**.

Now practice the dialogue with a partner. Be sure to **STRESS** the boldfaced words.

CHECK YOURSELF 1

Read the sentences aloud. Circle all content words and underline all function words. (For answers to Check Yourself 1–3, see Appendix II, page 284.)

EXAMPLE The dogs are barking.

- | | |
|--------------------------------|------------------------------|
| 1. Mary is a good friend. | 6. The store opens at nine. |

| 3. It's early in the morning. | 8. Please look for the book. |
| 4. The baby caught a cold. | 9. He's leaving in a week. |
| 5. I ate a piece of pie. | 10. We walked in the snow. |

Check your answers. Then read the sentences aloud again. Be sure to *stress* all content words and *unstress* all function words.

CHECK YOURSELF 2

Read the sentences aloud. In each sentence, the function words have been omitted. Fill in the blanks with appropriate function words.

EXAMPLE I went to the store.

1. Mary wants _____ cup _____ coffee.
2. _____ show started _____ eight.

4. Sue ate _____ slice _____ cake.
5. We met _____ couple _____ friends _____ mine.

Check your answers. Then practice reading the sentences aloud again. Remember, do not stress the function words!

CHECK YOURSELF 3

Read the sentences aloud. One word in each sentence will be stressed more than the others. Circle the word that you must stress to clarify the intended meaning of the sentence.

EXAMPLES Mary (Hall) will visit John and Anna. (Not Mary Jones.)

Mary is from (Washington). (She isn't from New York.)

1. Mary is Anna's friend. (She isn't her cousin.)
2. John is married to Anna. (They aren't engaged anymore.)
3. She's from Washington, D.C. (She's not from Washington state.)
4. She lives in the white house. (She doesn't live in the White House.)
5. Her house is on First Street. (It isn't on First Avenue.)
6. Anna and John got married three years ago. (They didn't get married five years ago.)
7. They own a small home. (They don't rent.)
8. Mary wants to come in a week. (She doesn't want to wait a month.)
9. She'll bring her collie and snakes. (She's not bringing her poodle.)
10. Mary is opening a pet store. (She isn't opening a toy store.)

More Practice

EXERCISE

Read the paragraph aloud. Remember, the boldfaced words should receive more emphasis than the other words in the sentence.

Everybody, Somebody, Anybody, and Nobody!

Once upon a **time**, there were **four** people. They were named **Everybody**, **Somebody**, **Anybody**, and **Nobody**. An **important** job had to be done. **Everybody** was sure that **Somebody** would do it. **Anybody** could have done it, but **Nobody** did it. **Somebody** got angry about that, because it was **Everybody's** job. **Everybody** thought **Anybody** could do it and that **Somebody** would do it. It ended **up**, **however**, that **Everybody** blamed **Somebody** when **Nobody** did what **Anybody** could have done!

We hope this chapter on stress didn't cause you any stress! You did a beautiful job! It's time to take a break and **RELAX** for a while. When you're well rested, move on to the next lesson. *You'll soon get the RHYTHM!*

Rhythm in English

The rhythm of conversational English is more rapid than that of formal speech. Every spoken sentence contains syllables or words that receive primary stress. Certain words within the sentence must be emphasized, while others are spoken more rapidly. To keep the sentence flowing smoothly, words are linked together into phrases and separated by pauses to convey meaning clearly. Effective use of rhythm will help you to achieve more natural-sounding speech.

Possible Pronunciation Problems

In many languages, all vowels in all syllables are pronounced almost equally. Syllables are rarely lost or reduced as they are in English. It is likely that you are using your language's conversational rhythm patterns when speaking English. This habit will contribute to a noticeable foreign accent.

1. If you stress each word equally or too precisely:

EXAMPLE "He will leave at **three**" will sound like "**He** will leave at **three**."

2. If you avoid the use of contractions or reduced forms:

EXAMPLES "I **can't** go" will sound like "I **can not** go."

"He likes **ham'n eggs**" will sound like "He likes **ham and eggs**."

3. If you insert pauses incorrectly between the words of the sentence, you will distort the meaning of your sentence and create a choppy rhythm.

EXAMPLE "I don't know Joan" will sound like "I don't know, Joan."

We know this can be slightly confusing at first. Please do not be concerned!
THE EXERCISES IN THIS CHAPTER WILL GET YOU RIGHT INTO THE RHYTHM!

Contractions

Contractions are two words that are combined together to form one. Contractions are used frequently in spoken English and are grammatically correct. If you use the full form of the contraction in conversation, your speech will sound stilted and unnatural.

Contraction

I'll
you're
he's
we've
isn't

Full Form

I will
you are
he is
we have
is not

Practice

EXERCISE A

Read the pairs of sentences aloud. The first sentence is written in full form; the second contains a contraction. Listen to how smooth and natural the second sentence sounds compared with the choppy rhythm of the first sentence.

- | | |
|--------------------------|----------------------|
| 1. I am late again. | I'm late again. |
| 2. Mary does not know. | Mary doesn't know. |
| 3. You are next in line. | You're next in line. |
| 4. We have already met. | We've already met. |
| 5. That is right! | That's right! |
| 6. They will not sing. | They won't sing. |
| 7. Steve has not eaten. | Steve hasn't eaten. |
| 8. He is very nice. | He's very nice. |
| 9. Please do not yell. | Please don't yell. |
| 10. We will be there. | We'll be there. |

Blending and Word Reductions

In conversational English, the words in phrases and short sentences are often blended together as if they were one word.

EXAMPLES "How are you?" is often pronounced "Howaryou?"
"Do it now!" is often pronounced "Doitnow!"

When words are blended together in this manner, sounds are frequently reduced or omitted completely. (The blending of words and the reductions and omissions of sounds occur **ONLY** in conversational speech. They are **NEVER** written this way.)

EXAMPLES "I miss Sam" sounds like "I misam."
"Don't take it" sounds like "Don'take it."

This style of speaking (the use of *contractions*, *blending*, and *word reductions*) is used by American English speakers in normal conversation and is perfectly acceptable spoken language. Try to use these forms as often as possible when speaking English. **YOU'LL SOON GET THE RHYTHM!**

EXERCISE B

Listen and repeat the phrases. Be sure to blend the words together smoothly and to use reduced forms.

- | | |
|-------------------------|---------------------------|
| 1. cream'n sugar | (cream and sugar) |
| 2. bread'n butter | (bread and butter) |
| 3. ham'n cheese | (ham and cheese) |
| 4. pieceapie | (piece of pie) |
| 5. I gota school. | (I go to school.) |
| 6. He had a cupacoffee. | (He had a cup of coffee.) |
| 7. I wanna takeabreak. | (I want to take a break.) |

- | | |
|------------------|--------------------|
| 8. Seeyalater. | (See you later.) |
| 9. Leavmealone. | (Leave me alone.) |
| 10. Whatimeisit? | (What time is it?) |

Linking

Linking sounds while speaking is necessary to speak English smoothly and to sound like a native speaker of English. Linking is the connecting of the last sound in one word to the first sound of the next word. The amount of linking in a person's speech varies from speaker to speaker. However, there are two situations in which most native speakers of English use linking regularly.

When a word begins with a vowel sound, it is often pronounced as if it began with the final consonant sound of the previous word.

EXAMPLES "Don't ask" sounds like "Don 'task."
 "We've eaten" sounds like "We 'veaten."

When the same consonant sound that ends one word also begins the next word, that sound should not be pronounced twice. It should be pronounced one time but with a slightly lengthened articulation.

EXAMPLES warm milk = war milk
 cold day = col day

EXERCISE C

Listen and repeat the phrases. Be sure to pronounce the words beginning with vowel sounds as if they begin with the last consonant sound of the previous word.

- | | |
|-------------------------|-----------------------|
| 1. take over | (ta kover) |
| 2. look up | (loo kup) |
| 3. It's open. | (It sopen.) |
| 4. Make a wish. | (Ma ka wish.) |
| 5. Kiss aunt Alice. | (Ki saun talice.) |
| 6. Leave him alone. | (Leave hi malone.) |
| 7. Let's eat now. | (Let seat now.) |
| 8. Call another friend. | (Ca lanother friend.) |
| 9. Jump up and down. | (Jum pu pan down.) |
| 10. Buy a red envelope. | (Buy a re denvelope.) |

EXERCISE D

Listen and repeat the phrases. Be sure to pronounce the identical consonant letters in the adjacent words as ONE sound.

- | | |
|---------------------------|-------------------------|
| 1. Get two tickets. | (Ge two tickets.) |
| 2. Stop pushing me. | (Sto pushing me.) |
| 3. It's less serious. | (It's le serious.) |
| 4. My mom made lemon pie. | (My mo made lemon pie.) |
| 5. Will Linda be there? | (Wi Linda be there?) |

Double Consonants

Many words in English are spelled with the same two consecutive consonant letters (e.g., “little” or “coffee”). Pronouncing the same sound twice will disrupt your rhythm of spoken English and contribute to your accent.

EXAMPLES pretty will sound like pret-ty
happen will sound like hap-pen

EXERCISE E

Read the words aloud. Be sure to pronounce the identical consonant letters in each word as ONE sound.

- | | |
|------------|-------------|
| 1. trigger | 9. parrot |
| 2. coffee | 10. paddle |
| 3. fussy | 11. little |
| 4. silly | 12. passing |
| 5. cotton | 13. butter |
| 6. happy | 14. pillow |
| 7. penny | 15. traffic |
| 8. offer | |

Phrasing and Pausing

Phrase: A phrase is a thought group or a group of words that convey meaning.

Pause: A pause is a brief moment during which the speaker is silent.

Sentences should be divided into phrases or thought groups through the use of pauses. The speaker can use a pause to convey or emphasize meaning or simply to take a breath!

EXERCISE F

Listen and repeat the sentences. Be sure to PAUSE between phrases (marked by the slanted lines) and to blend the words in each phrase.

1. The phone book//is on the shelf.
2. Steve said//“Sue is gone.”
3. “Please help me//Sally.”
4. Mr. White//our neighbor//is very nice.
5. I don’t agree//and I won’t change my mind.
6. Please finish your homework//before you go out.
7. Dr. Stevens//our new dentist//cancelled my appointment.
8. Do you prefer to eat//steak with French fries//or steak with rice?
9. I like to go for long walks//when the weather is sunny and cool.
10. My dog barks at people//when they knock on the door.

EXERCISE G

Read the pairs of sentences aloud. Be sure to pause between phrases. Listen to how the meanings of the sentences change when you vary your phrasing and pausing.

1. I know Ana. (You're talking to someone else *about* Ana.)
I know// Ana. (You're talking directly *to* your friend Ana.)
2. Please call me Mary. (You're telling someone that *your* name is Mary.)
Please call me// Mary. (You're asking *your friend* Mary to telephone you.)

Who will help// Steve? (You're *directly* asking Steve a question.)

"Tammy"// said the teacher// "is smart." (The teacher says Tammy is smart.)
5. Ricky thought his friend was lazy. (Ricky is thinking his friend is lazy.)
"Ricky"// thought his friend// "was lazy." (The friend is thinking Ricky is lazy.)

Sound Changes

The rapid speech of native American English speakers might be difficult for you to understand at times. Sounds in words may run together, disappear, or actually change.

EXAMPLES "When did you see her?" might sound like "Whenja see-er?"
"I'll meet you" might sound like "I'll meetcha."

It's true that such expressions are not "the King's English." In fact, the king would probably turn over in his grave if he were to hear them! Nevertheless, American English speakers use such rhythm patterns in informal, rapid speech. It is important for you to be able to understand these expressions when you hear them.

EXERCISE H

Listen to the commonly used expressions presented using the rapid, informal rhythm.

- | | |
|-------------------|------------------------|
| 1. Whatsidoin? | (What is he doing?) |
| 2. Whenjarive? | (When did you arrive?) |

10. When in Rome do//as the Romans do.
 When in Rome//do as the Romans do.

Check your answers. Then read aloud again the correctly marked sentences. Be sure to PAUSE where marked by the slanted lines and blend the words in each phrase.

CHECK YOURSELF 3

Read the dialogue aloud with a partner. Circle all contractions and linked words. Then on the lines below, list these shortened forms and write their full form equivalent.

Frances Black: Hello, this is the Black residence. This is Frances Black speaking.

Ellie White: Howarya Frannie? It's Ellie. Doyawanna come over for a cupacoffee?

Frances Black: Eleanor, I am very sorry I can not visit you. I am going to lunch at the club.

Ellie White: That's OK. I'm gonna eat at Burger Palace. Why don't we go tathamovies tonight?

Frances Black: We will not be able to join you. We have tickets for the opera.

Check your answers. Then change roles and read the dialogue again with a partner. Be sure to blend the words together smoothly and use the appropriate shortened forms.

More Practice

EXERCISE A

Record yourself while speaking to a friend by telephone. Listen to your responses carefully. Write down any sentences in which you could have used a contraction instead of the full form. Practice saying the sentences again using the contractions.

EXERCISE B

Read the poems aloud several times. Thought groups or phrases have been marked for you to follow. Be sure to blend the words within each phrase together smoothly without chopping them up with unnecessary pauses. Also, concentrate on linking the final consonant of one word to the initial vowel sound of the next word within each phrase.

Paul Revere's Ride (Excerpt)

Henry Wadsworth Longfellow

Paul Revere is famous for his part in the American Revolution. He rode through the streets at midnight, warning "The British are coming!" to everyone who would listen.

Listen, // my children, // and you shall hear //
Of the midnight ride // of Paul Revere, //
On the eighteenth of April, // in Seventy-Five: //
Hardly a man // is now alive //
Who remembers // that famous day // and year. //

He said to his friend, // "If the British march //
By land or sea // from the town tonight, //
Hang a lantern aloft // in the belfry arch //
Of the North Church tower // as a signal light, //
One // if by land, // and two // if by sea; //
And I // on the opposite shore will be, //
Ready to ride // and spread the alarm //
Through every Middlesex village // and farm, //
For the country-folk // to be up // and to arm." //

So through the night//rode Paul Revere; //
And so through the night//went his cry of alarm//
To every Middlesex village//and farm, //
A cry of defiance//and not of fear, //
A voice in the darkness, //a knock at the door, //
And a word//that shall echo//forevermore! //
For, //borne on the night-wind//of the Past, //
Through all our history, //to the last, //
In the hour of darkness//and peril//and need, //
The people will waken//and listen to hear//
The hurrying hoof-beats//of that steed, //
And the midnight message//of Paul Revere. //

Lesson 22 Intonation

Definition

Intonation refers to the use of melody and the rise and fall of the voice when speaking. Each language uses rising and falling pitches differently and has its own distinctive melody and intonation patterns. In fact, babies usually recognize and use the intonation of their native language before they learn actual speech sounds and words.

Intonation in English

Intonation can convey grammatical meaning as well as the speaker's attitude. It will "tell" whether a person is making a statement or asking a question; it will also indicate if the person is confident, doubtful, shy, annoyed, or impatient. Correct use of intonation is necessary to convey your message correctly and to make you sound like a native English speaker.

Possible Pronunciation Problems

English has several basic intonation contours. However, there are many more possible variations that change with a speaker's intended meaning, attitude, and emotional state of mind. Without realizing it, you can confuse your listeners by using incorrect English intonation patterns.

1. If your voice rises when it should fall, you will:
 - a. change a declarative sentence into a question.
 - b. sound doubtful or annoyed.
2. If your voice stays level when it should either rise or fall, you will:
 - a. sound bored or uninterested.
 - b. confuse your listeners into thinking you didn't finish your sentence or question.

EXAMPLE

"That's Bill's car" will sound like "That's Bill's car?"

EXAMPLE

"I went home" will sound like "I went home . . . and . . ."

Listen to the CD several times before trying to imitate the instructor. With practice, you will soon notice a great improvement. KEEP UP THE GOOD WORK!

Phrases Ending with a Falling Pitch

1. Declarative sentences

EXAMPLES Linda is my sister. ↘ He is not going. ↘

2. Questions that require more than a *yes/no* response (such question words include *who, what, when, why, where, which, how*)

EXAMPLES Where is my book? ↘ (On the table. ↘)
When did he leave? ↘ (At three o'clock. ↘)

Phrases Ending with a Rising Pitch

1. Questions that ask for a *yes/no* response (such question words include *can, do, will, would, may, and is*)

EXAMPLES Will you stay? ↗ (No, I can't. ↘)
Do you like school? ↗ (Yes, I do. ↘)

2. Statements that express doubt or uncertainty

EXAMPLES I'm not positive. ↗
I think he's coming. ↗

Practice

EXERCISE A

Listen and repeat the statements. Make your voice *fall* at the end of each of the sentences. Remember, questions that cannot be answered with *yes* or *no* take the same *downward* intonation as declarative sentences.

1. I have four brothers. ↘
2. He is not my friend. ↘
3. We like ice cream. ↘
4. Tim bought a new car. ↘
5. She likes to play tennis. ↘
6. What is your name? ↘
7. How is your family? ↘
8. Who will drive you home? ↘
9. Why did he leave? ↘
10. Which book is yours? ↘

EXERCISE B

Listen and repeat the *yes/no* questions and sample responses. Be sure your voice *rises* ↗ at the end of each question and *falls* ↘ at the end of each response.

<u>Yes/No Questions</u> ↗	<u>Responses</u> ↘
1. Can you see?	Yes, I can.
2. Does he play golf?	Yes, he does.
3. May I borrow it?	Yes, you may.
4. Will she help?	No, she won't.
5. Did he arrive?	Yes, he's here now.
6. Is Susan your sister?	No, she's my friend.
7. Have they eaten?	Yes, they ate at two.
8. May I help you?	Yes, please do.
9. Are we leaving?	No, we're staying.
10. Can my friends stay?	Yes, they can.

Sounding Confident Instead of Uncertain

As was already discussed, a *falling* pitch should be used at the end of declarative sentences. It will help you sound confident and sure of yourself. On the other hand, using an *upward* pitch at the end of the same sentences indicates that the speaker is doubtful or uncertain about what he or she is saying.

EXAMPLE They have twenty children. ↘ (stated as a fact)
 They have twenty children. ↗ (stated with doubt or disbelief)

EXERCISE C

Listen and repeat the statements. Use a *falling* pitch to end the sentences on the left and an *upward* pitch to end the sentences on the right. (Notice how the *falling* pitch in the first reading helps you to sound sure of yourself, while the *rising* pitch in the second reading makes you sound doubtful or uncertain.)

<u>Stated with Certainty</u> ↘	<u>Stated with Doubt</u> ↗
1. He ate twenty-five hot dogs.	He ate twenty-five hot dogs.
2. The boss gave him a raise.	The boss gave him a raise.
3. You ran 55 miles.	You ran 55 miles.
4. Mike was elected president.	Mike was elected president.
5. It's already three o'clock.	It's already three o'clock.

Intonation in Sentences with Two or More Phrases

Intonation also tells the listener whether a speaker has completed the statement or question or whether he or she has more to say. Many sentences are spoken with two or more phrases joined together with such connecting words as *and*, *if*, *so*, or *but*.

EXAMPLES He can sing, **but** he can't dance.
 We were hungry, thirsty, **and** tired.

If your voice drops after the first phrase, your listener will think you are finished with the sentence. To make it clear that you have more to say, you must keep your voice *level* → before the connecting word. There are three main types of sentences:

1. Declarative sentences with two or more phrases

Keep your voice *level* → before the connecting word and *lower* it at the end. ↘

EXAMPLES I must buy coffee →, tea →, and milk. ↘
She speaks French → but not Spanish. ↘

2. Questions presenting two or more choices

This intonation pattern is the same as for declarative sentences with two or more phrases. Keep your voice *level* → before the connecting word and *lower* it when you finish your question. ↘

EXAMPLES Would you like cake → or pie? ↘
Is he leaving tomorrow → or Sunday? ↘

3. Yes/No questions with two or more phrases

Keep your voice *level* → before the connecting word, and use a *rising pitch* ↗ at the end of your question.

EXAMPLES Will you come → if I drive you? ↗
Did he like the new belt → and gloves I bought? ↗

EXERCISE D

Listen and repeat the statements and questions. (The arrows are there to remind you to use the proper intonation patterns.)

1. May I leave now →, or should I wait ↘?
2. Did you buy a new hat → or pants ↘?
3. He missed his bus → but arrived on time ↘.
4. Call me later →, if it's not too late ↘.
5. Will you visit us → if you're in town ↗?
6. I'll leave early →, so I won't miss the plane ↘.
7. Do you like grapes →, pears →, and plums ↗?
8. He's good at math → but not spelling ↘.
9. You may stay up late → if you finish your homework ↘.
10. He went sailing →, swimming →, and fishing ↘.

CHECK YOURSELF 1

Listen and repeat the statements and questions. Indicate whether they have a falling or rising intonation by marking an X in the appropriate column. (For answers to Check Yourself 1–3, see Appendix II, pages 286–287.)

Part 3

Consonants

Lesson 23 Pronouncing the Consonants of American English

You have probably discovered that English spelling patterns are inconsistent and are not always a reliable guide to pronunciation. For example, in the following words, the letters *ch* represent *three* different sounds.

machine chain mechanic

Pretty confusing, right? That's why the International Phonetic Alphabet (IPA) is helpful. The IPA, which is used all over the world, consists of a set of symbols in which ONE symbol always represents ONE sound.

As with the vowels in Part 1, each consonant will be introduced and explained one at a time. To help you learn the exact pronunciation of the phonetic symbols and key words, a Key to Pronouncing the Consonants of American English is presented on page 117. Refer to it, and listen to the pronunciation of the sounds, as needed.

Definitions

As you progress through the consonant lessons, you will frequently see the terms *gum ridge*, *soft palate*, *aspiration*, *voiced consonant*, *voiceless consonant*, and *articulators*. We will now define these terms for you.

Articulators: The articulators are the different parts of the mouth area that we use when speaking, such as the lips, tongue, soft palate, teeth, and jaw.

Gum ridge: The gum ridge is the hard part of the roof of your mouth just behind your upper front teeth.

Soft palate: The soft palate is the soft, movable, rear portion of the roof of your mouth.

Aspiration: Aspiration means the action of pronouncing a sound with a puff of released breath. The English consonants [p], [t], [k], and [h] are “aspirate” sounds. They should be produced with a strong puff of air.

Voiced consonant: A voiced consonant is a sound produced when the vocal cords are vibrating. Place your hand on your throat over your vocal cords while making a humming sound. You can feel your vocal cords vibrate as you say “mmmmmmmmmm.”

Voiceless Consonant: A voiceless consonant is a sound made with no vibration of the vocal cords. Put your hand over your vocal cords and make the hissing sound “ssssssss.” You will not feel any vibration this time!

The various consonant sounds are created by:

1. The position of your articulators. For example, the tip of your tongue must touch the upper gum ridge to say sounds like [t], [d], [n], or [l], but must protrude between your teeth to say [θ] as in *think* or [ð] as in *them*.
2. The way the breath stream comes from your mouth or nose. For example, the breath stream, or airstream, is continuous for the consonants [s] or [f], but is completely stopped and then exploded for [p] or [t]. The airstream flows through the *nose* for [m], [n], and [ŋ] and through the *mouth* for all other consonants.
3. The vibration of your vocal cords. For example, your vocal cords do not vibrate for the sounds [s], [f], or [t], but you must add “voicing” for the sounds [z], [v], or [d].

The chart on the right categorizes the voiced and voiceless consonants. Don’t try to memorize the chart! Just put your hand over your vocal cords as you practice saying the sounds. You will be able to hear and *feel* the difference between voiced and voiceless consonants.

PRONOUNCING [s]

Tongue tip: Near but not touching gum ridge behind upper front teeth

Airstream: Continuous without interruption

Vocal cords: Not vibrating

Possible Pronunciation Problems

The sound [s] is a common sound. Some speakers may incorrectly say [ε] before [s] in English. Others may say [ʃ] instead of [s] before [i] and [r].

EXAMPLES If you produce [ε] before [s]: **state** will sound like **estate**.

If you say [ʃ] instead of [s]: **sip** will sound like **ship**.

As you say [s], keep the airstream steady, like the hissing sound of a snake (ssssssss)!

So study and practice; you'll soon have success with [s]!

The letter s in plural nouns is pronounced [s] when it follows most voiceless consonants.

EXERCISE

Read aloud the essay about Thomas Edison. Pay attention to the boldfaced words containing the [s] sound.

Silence Is Literally Golden!

Thomas Edison was a great American inventor. **This** is a true **story** about how **silence** really paid off for him. He invented a new ticker; the **Western Union Company** wanted to **purchase** it. **Edison** didn't know how much to **ask**. He **requested** **several** days to think about the **selling price**.

Thomas and **Mrs. Edison** **discussed** **Western Union's** offer. **Mrs. Edison** suggested that he **ask** twenty thousand dollars (\$20,000). He was **stunned** by this **staggering price** but **accepted** his **wife's advice**.

When the **Western Union officer** **asked** Mr. **Edison**, "What **price** have you **decided** to **ask**?" Mr. **Edison** **started** to **state** \$20,000, but the amount got **stuck** on his tongue. He **stood** there **speechless**. The **Western Union** negotiator became impatient with Mr. **Edison's silence** and **asked**, "Will you **accept** one hundred thousand dollars (\$100,000)?" **So**, as you can **see**, **silence** can be golden!

PRONOUNCING [z]

Tongue tip: In the same position as for [s]

Airstream: Continuous without interruption

Vocal cords: Vibrating

Possible Pronunciation Problems

The sound [z] is not a common sound. Many students pronounce the letter z in English as an [s] or [d]. Also, irregular English spelling patterns contribute to problems with this consonant.

EXAMPLES If you say [s] instead of [z]: **zoo** will sound like **Sue**.
eyes will sound like **ice**.

If you say [dʒ] instead of [z]: **zest** will sound like **jest**.

Remember, [z] is a voiced sound; your vocal cords **MUST** vibrate or you will say [s] by mistake.

Think of the buzzing sound of a bee (bzzzzzzzzzz) and you'll say your Zs with ease!

Practice

EXERCISE A

Listen and repeat. Put your hand on your throat so that you can feel your vocal cords vibrate as you pronounce the consonant [z].

[z] At the Beginning of Words

zoo	zinc	zebra

[z] In the Middle of Words

his	daze	breeze

[z] Spelled

note

The letter x is a less common spelling pattern for [z].

hint

The letter s is usually pronounced [z] when between vowels and in a stressed syllable.

deserve because resign

The letter s in plural nouns is pronounced [z] when it follows a vowel or most voiced consonants.

shoes legs leaves beds cars

The vowel BEFORE [z] at the end of a word is always prolonged more than before [s]. (Vowels are also prolonged before [b], [d], [v], and [g] at the end of a word.) Prolonging the vowel before [z] helps to distinguish it from [s].

1. Easy does it.
2. zero degrees
3. a cool breeze
4. a dozen eggs

Lesson 25 [t] as in *top*, *return*, and *cat*

PRONOUNCING [t]

Tongue tip: Firmly pressed against gum ridge behind upper front teeth

Airstream: Stopped and then exploded

Vocal cords: Not vibrating

Possible Pronunciation Problems

The consonant [t] is a common sound and, for many learners, it does not cause much difficulty. When pronouncing [t], your tongue tip should touch the upper gum ridge, NOT the back of your upper front teeth. [t] must be said with strong aspiration and a puff of air or it might sound like [d]. Some speakers tend to say [ts] instead of [t] before [u] or [tʃ] in place of [t] before [i] and [ɪ].

EXAMPLES If you say [d] instead of [t]: **two** will sound like **do**.
If you say [ts] instead of [t]: **tune** will sound like **tsune**.
If you say [tʃ] instead of [t]: **tease** will sound like **cheese**.

Practice saying [t] while loosely holding a tissue in front of your mouth. If you aspirate [t] correctly and say it with a puff of air, your tissue will flutter.

So—be sure to practice all the time; you'll make a terrific [t].

Practice

EXERCISE A

Listen and repeat.

[t] At the Beginning of Words

to	talk	time
ten	tell	table
try	tree	terrible
top		

[t] In the Middle of Words

until	attend	between
after	return	contain
empty	winter	printing
wanted		

[t] At the End of Words

it	went	state
but	late	fruit
ate	light	apart
boat		

hint

The letter *t* is usually pronounced [t].

The letters *ed* in past tense verbs are pronounced [t] when they follow a voiceless consonant.

stopped looked kissed washed

When [t] is between two vowels and follows a stressed syllable (as in *water*, *butter*, and *city*), it is NOT aspirated.

When [t] follows *s* (as in *stop*, *stay*, *stick*), it is NOT aspirated with a puff of air.

hint

Some speakers of various Asian languages tend to add the sound [o] to words ending in [t] in English (the word *cat* becomes *cato*, the word *sit* becomes *sito*). Be sure you avoid this extra vowel when practicing words with final [t].

EXERCISE B

Listen and repeat. The letter *t* in the following words occurs between vowels, so it is NOT aspirated.

city	water
pretty	writing
better	sitting
notice	pattern
butter	cutting

EXERCISE C

Listen and repeat. Pay attention to the [t] sound in the boldfaced words and phrases. Be sure to aspirate [t] at the beginning of words.

1. Tell the teacher.
2. **tea** and **toast**
3. **to** be or **not to** be
4. **Take** your **time**.
5. **Today** is **Tuesday**, **October tenth**.
6. **Turn** off the **light**.
7. **Tim** bought two tickets to the **tennis** tournament.
8. **Pat** wrote a poem.
9. The **boat** won't return until **eight**.
10. Should we leave a **fifteen percent tip**?

Lesson 26 [d] as in *day, ladder, and bed*

PRONOUNCING [d]

Tongue tip: Firmly pressed against gum ridge behind upper front teeth

Airstream: Stopped and then exploded

Vocal cords: Vibrating

Possible Pronunciation Problems

1. The sound [d] should be produced with the tongue tip touching the upper gum ridge. It should NOT touch the back of your upper front teeth or be placed between your teeth.

EXAMPLES

If you say [ð] instead of [d]: **ladder** will sound like **lather**.
breeding will sound like **breathing**.

2. When [d] is the last sound in a word, many speakers forget to make their vocal cords vibrate. This will make [d] sound like a [t] and confuse your listeners.

EXAMPLES

If you say [t] instead of [d]: **card** will sound like **cart**.
bed will sound like **bet**.

Press your tongue tip against the gum ridge behind your upper front teeth and add voicing when you pronounce [d].

Don't forget to practice [d] every day!

Richard: Will you teach me how to wash clothes?

Marshall: Be sure to wash white shirts separately. Don't use too much soap.

Richard: I wish Sharon would return. It's more natural for a woman to wash and shop.

Marshall: You sound like a chauvinist! I don't mind doing chores. I'm great in the kitchen, too!

Richard: Would you like to take charge? I'll cheerfully pay you cash.

Marshall: Listen, old chap, I'm a bachelor and too old to chase after children. I'm in a rush. It's been nice chatting with you, Richard.

"Twas the Night Before Christmas

Clement Clark Moore

'Twas the night before Christmas, when all through the house
Not a **creature** was stirring, not even a mouse;
The stockings were hung by the **chimney** with care,
In hopes that St. Nicholas soon would be there;
The **children** were nestled all snug in their beds,
While visions of **sugar**-plums danced in their heads;
And Mamma in her '**kerchief** and I in my cap,
Had just settled down for a long winter's nap,
When out on the lawn there arose such a clatter,
I sprang from my bed to see what was the matter.

Away to the window I flew like a **flash**,
Tore open the **shutters** and threw up the **sash**.
When what to my wondering eyes **should** appear,
But a **miniature** sleigh, and eight tiny reindeer
With a little old driver, so lively and quick,
I knew in a moment it must be St. Nick.
More rapid than eagles his coursers they came,
And he whistled, and **shouted**; and called them by name;
"Now, **Dasher**! now, Dancer! now, Prancer and Vixen!
On, Comet! on, Cupid! on, Donner and Blitzen!
To the top of the **porch**, to the top of the wall!
Now **dash** away! **dash** away! **dash** away all!"

Lesson 36 [p] as in *pay*, *apple*, and *stop*

PRONOUNCING [p]

Lips: Pressed together

Airstream: Stopped and then exploded

Vocal cords: Not vibrating

Possible Pronunciation Problems

This consonant is familiar to speakers of most languages. However, [p] is much more explosive in English than it is in other languages. When speaking English, [p] at the beginning of words must be produced with strong aspiration or it might sound like [b].

EXAMPLES If you forget to aspirate [p]: **pear** will sound like **bear**.
pat will sound like **bat**.

When *p* follows *s* (as in *spot*, *spend*, *spy*), it is NOT aspirated. Practice saying [p] by loosely holding a tissue in front of your lips. If you aspirate [p] correctly, releasing a puff of air, the tissue will flutter.

So puff, puff, puff, and you'll pronounce a perfect [p]!

PRONOUNCING [l]

Tongue tip: Pressed against gum ridge behind upper front teeth

Airstream: Continuous and passes over both sides of the tongue

Vocal cords: Vibrating

Possible Pronunciation Problems

The consonant [l] may not exist in your language. The differences between [l] and [r] may be difficult for you to hear, causing you to confuse the two sounds.

EXAMPLES If you say [r] instead of [l]: **flight** will sound like **fright**.
late will sound like **rate**.

The consonant [l] will be easier for you to say if you concentrate on feeling your tongue tip press against your upper gum ridge like [t].

Learn your lessons well. You will say a perfect [l]!

Practice

EXERCISE A

 Listen and repeat the words. They should be pronounced with [l]. (When [l] is the last sound in a word, the back of the tongue should be raised higher than for [l] at the beginning or in the middle of words.)

[l] At the Beginning of Words

let leg long
late last leave
light little
learn live

[l] In the Middle of Words

only alone asleep
hello salad yellow
family believe
balloon alive

[l] At the End of Words

all call able
fill fool table
apple trouble
people tell

hint

When an unstressed syllable begins with [t] or [d] and ends in [l], the [l] frequently becomes its own syllable. It is formed by keeping your tongue tip on your upper gum ridge without moving it from the position of the preceding [t] or [d].

paddle little bottle saddle noodle

EXERCISE B

Listen and repeat these short sentences. Remember to raise the back of your tongue higher when you say the [ɪ] at the END of the boldfaced words.

1. He's **ill**.
2. Linda is **tall**.
3. It's not **small**.
4. Don't **yell** at me.
5. I don't want to **fall**.

hint

Speakers of other languages frequently produce [ɪ]-blends incorrectly by inserting a vowel between sounds (for example, *plight* becomes *polite*). When saying words pronounced with [ɪ]-blends, take care not to incorrectly insert a vowel sound before the [ɪ]. Lesson 52, Pronouncing Consonant Clusters (page 236), will give you lots of practice perfecting your pronunciation of various consonant clusters.

EXERCISE C

Listen and repeat the phrases and sentences. The boldfaced words should be pronounced with [ɪ].

1. **telephone** call

4. **Light** the **candle**.
5. **Please** **believe** me.
6. **Learn** your **lesson** **well**.
7. **Will** you **mail** the **letter**?
8. The **little** **girl** **fell** **asleep**.
9. **Lucy** **lost** her **locket**.
10. He who **laughs** **last**, **laughs** **best**.
11. Do you **like** **chocolate** or **vanilla**?
12. The **airplane** **flight** **leaves** at **eleven**.

14. You can't **fool** **all** of the **people** **all** of the time.
15. **Leave** the **umbrella** in the **hall** **closet**.

Learn your lessons well. You will say a perfect [I]!

PRONOUNCING [r]

**Lips:** Rounded**Tongue tip:** Curled upward but not touching the roof of the mouth**Airstream:** Continuous**Vocal cords:** Vibrating

Possible Pronunciation Problems

The sound [r] as it is produced in English may not exist in your language. Some speakers mistakenly produce [w] instead of [r]. Others often substitute the [l] sound. You see, the [r] in many languages is a blend of English [r] and [l] and is produced by rapidly touching your tongue tip to the roof of your mouth. Pronunciation problems occur when you attempt to say the English [r] by touching the roof of your mouth with your tongue. This results in the substitution of [l].

EXAMPLES If you say [l] instead of [r]: **berry** will sound like **belly**.
rice will sound like **lice**.

If you say [w] instead of [r]: **red** will sound like **wed**.
right will sound like **white**.

Make sure that the tip of your tongue never touches your upper gum ridge but is curled upward toward the roof of your mouth.

Remember to practice [r] carefully and your [r] will be right on target!

Practice

EXERCISE A

Listen and repeat. Be sure your tongue does NOT touch your upper gum ridge when you say [r].

[r] At the Beginning of Words

 marry hurry around
 story carrot tomorrow

[r] At the End of Words

 far sure appear

hint

As with [l]-blends, you may produce [r]-blends incorrectly by inserting a vowel sound before the [r] (for example, *bride* becomes *buride*).

EXERCISE B

Listen and repeat. Each word contains an [r]-blend. Be careful not to insert a vowel before the consonant [r].

- | | |
|-----------------|------------------|

EXERCISE C

Read aloud the paragraph about Elizabeth Barrett Browning and her famous poem. Be sure to pronounce the boldfaced [r] and [l] sounds correctly.

The immortal words of Elizabeth Barrett Browning written for her husband and fellow poet have been read throughout the ages. Elizabeth was a brilliant poet in Victorian England, but she is remembered most for her great romance with Browning. She became an invalid after a fall. Robert first corresponded with her through letters and later they became engaged. Mr. Barrett, her father, tried to prevent the marriage, but the couple ran off to Italy. Elizabeth recovered and they remained near Florence for the rest of their married life. Here is one of the sonnets which reflects the growth of her love.

How Do I Love Thee?

Elizabeth Barrett Browning

How do I love thee? Let me count the ways.
I love thee to the depth and breadth and height
My soul can reach, when feeling out of sight
For the ends of Being and ideal Grace.
I love thee to the level of every day's
Most quiet need, by sun and candlelight.
I love thee freely as men strive for Right.

I love thee purely, as they turn from Praise;
 I love thee with the passion put to use
 In my old griefs, and with my childhood's faith.
 I love thee with a love I seemed to lose
 With my lost saints,—I love thee with the breath,
 Smiles, tears, of all my life! and, if God choose,
 I shall but love thee better after death.

The American Cowboy

Americans created the name *cowboy* for the men who cared for cattle. You might recall the typical singing cowboy in the movies. He was kind, courageous, and good-looking. He always caught the cow, colt, and of course the girl! But the real cowboy was a hard worker who had many difficult tasks. He had to take the cattle to market. These lonely cattle drives took many weeks through rough country. The cowboy had to protect the cattle and keep them from running off. In fact or fiction, the cowboy will continue to be a likeable American character. *Ride 'em cowboy!*

The Goose That Laid the Golden Eggs

One day a farmer was **going** to the nest of his **goose**. He found an **egg** that was all yellow, very **big** and **glittering**. At first, he **guessed** it was the **glow** of the sun reflected on the **egg**. But when he **gazed** at it carefully, he realized that it was an **egg** of pure **gold**. Every morning he would **eagerly go** back to the **goose** and find another **big golden egg**. He **grew** to be very rich and **greedy**. He thought that he could **get** all the **gold** at once if he could only **get** inside the **goose**. So this **greedy** man killed the **goose** and opened it up—only to find nothing!

We have all met individuals who are **greedy** and want more than they are already **getting**. For **example**, when people **bargain** on a purchase, if they **go** too low in their bid, they may **anger** the seller and lose the object. Remember: "Don't kill the **goose** that lays the **golden eggs**."

Abou Ben Adhem (may his tribe increase!)
Awoke one night **from** a deep **dream** of peace,
And saw, within the **moonlight** in his **room**,
Making it rich, and like a lily in **bloom**,
An angel writing in a book of gold:

Exceeding peace had **made** Ben Adhem bold,
And to the Presence in the **room** he said,
"What writest thou?" The Vision raised its head,
And with a look **made** of sweet accord
Answered, "The **names** of those who love the Lord."

"And is **mine** one?" said Abou. "Nay, not so,"
Replied the angel. Abou spoke **more** low,
But cheerily still; and said, "I pray thee, then,
Write **me** as one who loves his fellow **men**."

The angel wrote, and vanished. The next night
It **came** again with a great awakening light,
And showed the names **whom** love of God had blessed,

PRONOUNCING [n]

Tongue: Firmly pressed against gum ridge behind upper front teeth

Airstream: Continuous through the nose

EXAMPLES If you say [m] instead of [n]: **sun** will sound like **some**.

If you say [ŋ] instead of [n]: **ran** will sound like **rang**.

ALWAYS press your tongue tip firmly against the gum ridge behind your upper front teeth as you say [n], especially at the end of words.

Lesson 51 Pronouncing Final Consonant Sounds

Final Consonants in English

A final consonant is any consonant that is the last sound in a word. Consonant sounds that end words are very important. They can determine grammatical as well as word meaning. Careful production of final consonants is necessary to convey your message correctly and to sound like a native English speaker.

hint

Words pronounced with a final consonant often have *e* as the final letter. When *e* is the last letter in a word, it is usually silent; the consonant is actually the last sound.

made phone bite have

Possible Pronunciation Problems

In your language, the majority of words may end in vowels. Consonants may rarely be found at the ends of words. The opposite is true in English. The majority of words end in consonants. Because you are not used to using final consonants, you may frequently omit them at the end of words in English or add a vowel sound to the end of the word. Without realizing it, you can confuse your listeners, and they will have trouble understanding you.

EXAMPLES	You will not be saying your target word:	place will sound like play . card will sound like car .
	Your speech will be difficult to understand:	hat will sound like hato . dog will sound like dogu . some will sound like soma .
	Your listener won't understand you at all:	<i>ca</i> without a final consonant is meaningless. You could be trying to say <i>case</i> , <i>came</i> , <i>cake</i> , <i>cane</i> , <i>cage</i> , <i>cape</i> , or <i>cave</i> . Your listener would have to guess!

Practice

EXERCISE A

 Listen and repeat the words. The words in each row will sound the same if their final consonant sound is omitted. *Exaggerate* your pronunciation of the final consonant in each word.

State of Mind

Author Unknown

If you **think** you are beaten, you are.
If you **think** you dare not, you don't.
If you'd like to **win**, but you **think** you can't,
It's almost a **cinch** that you won't.

If you **think** you'll lose, you've lost;
For out **in** the world you'll find
Success begins with a person's **will**.
It's **all in** the state of mind!

Full many a race is lost
Before even a **step** is run.
And many a coward falls
Before even his **work** is begun.

Think high and your deeds will grow.
Think low and you'll **fall** behind.
Think that you can and you **will**.
It's **all in** the state of mind.

If you **think** you're outclassed, you are.
You have to **think** high to rise.
You have to be sure of yourself
Before you can **win** a prize.

Life's battles don't always go
To the stronger or faster **man**,
But sooner or later the **one** who wins,
Is the **one** who **thinks** he can!

EXERCISE B

Tape-record yourself while talking on the telephone. After you hang up, play the recording back. Analyze your speech and listen for final consonants. Make a list of words you didn't pronounce carefully and practice them.

Lesson 52 Pronouncing Consonant Clusters

Consonant Clusters in English

Consonant clusters are two or more consonant sounds grouped together in a word. They are pronounced with no vowels between them. Careful production of consonant clusters is necessary to convey your message correctly and to sound like a native speaker of English.

Possible Pronunciation Problems

Consonant clusters are difficult for many international speakers of English to pronounce. Often, English speakers pronounce groups of consonants and one vowel as a single syllable. Because this is different from most other languages, you might omit one of the consonant sounds in the cluster or insert a vowel sound between two of the consonants in the cluster. This will confuse your listeners and they may not understand you.

EXAMPLES

You will not be saying your target word:

Your speech or grammar will be difficult to understand:

asks will sound like **ax**.
fact will sound like **fat**.

asked will sound like **ask it**.
sport will sound like **support**.

If

Rudyard Kipling

If you can keep your head when all about you
Are losing theirs and **bl**aming it on you;
If you can **tr**ust yourself when all men doubt you,
But make allowance for their doubting too;
If you can wait and not be **tir**ed by waiting,
Or, being lied about, **don't** deal in lies,
Or, being hated, **don't** give way to hating,
And yet **don't** look too good, not talk too wise;

If you can **d**ream—and not make **dr**eams your master;
If you can **th**ink—and not make **th**oughts your aim;
If you can meet with **Tri**umph and Disaster
And **t**reat those two **im**posters **ju**st the same;
If you can bear to hear the **tr**uth you've **s**poke**n**
Twisted by knaves to make a **tr**ap for fools,
Or watch the **th**ings you gave your life to, **br**oken,
And **st**oop and **bu**ild them up with **wor**n-out tools;

If you can make one heap of all your winnings
And **r**isk it on one **tu**rn of pitch-and-toss,
And lose, and **st**art again at your **be**gin**ni**ngs
And never **b**reathe a **w**ord about your loss;
If you can **f**orce your **h**eart and **n**erve and sinew
To **s**erve your **tu**rn long after they are gone,
And so **h**old on when there is nothing in you
Except the will which says to them: "**H**old on!"

If you can talk with **crowds** and keep your virtue,
Or walk with **kings**—nor lose the common touch,
If neither foes nor loving **friends** can hurt you,
If all men count with you, but none too much;
If you can fill the unforgiving minute
With **sixty seconds'** worth of **distance** run—
Yours is the **Earth** and everything that's in it,
And—which is more—you'll be a Man, my son!

EXERCISE B

Think of ten words that contain with three-member consonant clusters. Then try to use as many of those words as you can in the same sentence. Practice saying your original sentences with a partner.

EXAMPLES scream, split, pants

When I **split** my **pants**, I started to **scream**.

When writing English, we add the ending *-ed* to form the past tense of regular verbs. That's easy to remember! However, when you are *speaking* English, the *-ed* ending can have three different pronunciations. Sometimes *-ed* sounds like [t], as in *stopped* [stapt]; sometimes it sounds like [d], as in *lived* [lɪvd]; sometimes it sounds like a new syllable, [ɪd], as in *loaded* [laʊdɪd].

Possible Pronunciation Problems

As discussed in Lesson 51, many consonants may not be found at the end of words in your language. Consequently, you may not be used to saying final consonants in English. This might make you omit or mispronounce past tense verb endings.

EXAMPLES

Past tense verbs will sound like present tense verbs:

washed will sound like **wash**.
played will sound like **play**.

A new syllable will be incorrectly added to a past tense verb:

lived [lɪvd] will sound like **live-id** [lɪvɪd].
tapped [tæpt] will sound like **tap-id** [tæpɪd].

You will not be saying your target past tense verb:

played [pleɪd] will sound like **plate** [pleɪt].
tied [taɪd] will sound like **tight** [taɪt].

This might seem confusing, but don't worry! We have good news! In this chapter we will teach you three EASY rules to help you pronounce past tense regular verbs correctly. You will learn when *-ed* sounds like [t], [d], or [ɪd]. Study the rules and *you've got it made!*

-ed PRONOUNCED [t]

The ending *-ed* will always sound like [t] when the last sound in the present tense verb is voiceless.

EXAMPLES talked [tɔkt] crossed [krɒst] laughed [læft]

Practice

EXERCISE

 Listen and repeat the verbs. Be sure to pronounce the **-ed** in the past tense verbs like [t]. (Do NOT add a new syllable to any word!)

look	looked
miss	missed
stop	stopped
work	worked
pick	picked
wash	washed
drip	dripped
pass	passed
place	placed
laugh	laughed

-ed PRONOUNCED [d]

The ending **-ed** will always sound like [d] when the last sound in the present tense verb is a vowel or voiced consonant.

EXAMPLES lived [lɪvd] turned [tɜːnd] played [pleɪd]

Practice

EXERCISE

 Listen and repeat the verbs. Be sure to pronounce **-ed** like [d]. (Do NOT add a new syllable to the words!)

fill	filled
burn	burned
rain	rained
live	lived
clean	cleaned
stare	stared
study	studied
follow	followed

-ed PRONOUNCED [ɪd]

The ending *-ed* will always sound like the new syllable [ɪd] when the last sound in the present tense verb is [t] or [d].

EXAMPLES wanted [waɪntɪd] rested [rɛstɪd] ended [ɛndɪd]

Practice

EXAMPLES You hear She **baked** [beɪkɪd] a pie. You circle C (I)

 You hear I **liked** [laɪkt] the book. You circle (C) I

Check your answers. Then read the verbs aloud. Try using one verb from each series in a sentence.

CHECK YOURSELF 4

Read the following dialogue with a partner. In the brackets above each past tense verb, write the phonetic symbol representing the sound of the -ed ending.

- Roberta: Karl, have you ^[] started your diet? I hope you haven't ^[d] gained any weight.
- Karl: I ^[] boiled eggs and ^[] sliced celery for lunch.

EXERCISE B

Think of a response to the question, "What happened to you today?" Be sure your response contains many past tense verbs. When you complete your response, work with a partner and ask him or her the same question. Use a chart like the one below to categorize the verbs according to the sound of their -ed endings.

EXAMPLE A: What **happened** to you today, Claude?

B: I **pulled** into my driveway, **lifted** the garage door, **backed** in, **knocked** over the bicycle, **parked** the car, **opened** the door, and was **shocked** to see my house had been **robbed**!

-ed = [t]	-ed = [d]	-ed = [ɪd]
backed knocked parked shocked	pulled opened robbed	lifted

When you are writing English, the letter *s* at the end of words serves many different purposes. The letter *s* is used to form plural nouns (*hats, dogs*); third-person present tense regular verbs (*he likes; she eats*); possessive nouns (*my friend's house; the dog's collar*); and contractions (*it's late; he's here*). As you can see, *s* is a very versatile letter in English. It is important to learn its many different sounds!

When you are speaking English, the *-s* ending can have three different pronunciations. It can sound like [s], as in *hats* [hæts]; [z], as in *tells* [telz]; or like a new syllable, [ɪz], as in *roses* [rouzɪz].

Possible Pronunciation Problems

Once again, the tendency to drop final consonants results in omissions or incorrect pronunciations of *-s* at the ends of words. This will make you difficult to understand and confuse your listeners.

EXAMPLES

Plural nouns will sound like singular nouns:

Two books will sound like **two book**.

Third-person present tense verbs will be incorrect:

He eats will sound like **he eat**.

She sings will sound like **she sing**.

Possessives and contractions will be omitted:

Bob's house will sound like **Bob house**.

He's right will sound like **he right**.

You will not be saying your target word:

My eyes will sound like **my ice**.

Sue sings will sound like **Sue sinks**.

You are probably wondering if there are any rules to help you correctly pronounce *s* in all these different situations. The answer is YES! In this lesson, you will learn how to pronounce *s* when it forms plurals, third-person present tense verbs, possessives, and contractions. Study the rules and listen to the CD carefully. You will soon notice a big improvement in your pronunciation!

CHECK YOURSELF 1

 **Listen to the sentences. Circle the ONE word in parentheses that you hear. (For answers to Check Yourself 1–3, see Appendix II, pages 307–308.)**

EXAMPLE Did you pay for the ((blouse)/blouses)?

1. The men cut the (tree/trees).
2. He repaired the (watch/watches).
3. The (book/book's) cover is red.
4. Did they finally make (peace/peas)?
5. Did you see the little (cups/cubs)?

 **Check your answers. Then read each sentence aloud twice. Use the first word in parentheses the first time and the contrast word the second time.**

CHECK YOURSELF 2

 **Listen and repeat the three-word groups. Circle the ONE word in each group of three that has an -s ending sound different from the others.**

EXAMPLE	belts	hats	(ties)
1.	talks	walks	runs
2.	dishes	gates	pages
3.	pears	apples	oranges
4.	eyes	noses	toes
5.	saves	makes	cooks
6.	newspapers	magazines	books
7.	dogs	birds	cats
8.	tables	chairs	couches
9.	dentists	doctors	lawyers
10.	lunches	beaches	chimes

Read the passages from William Shakespeare's plays. Circle all words with -s endings and write them under the phonetic symbol representing the sound of their -s ending. Use the chart at the bottom of the page.

From *As You Like It*

All the world's a stage,
And all the men and women merely players;
They have their exits and their entrances;
And one man in his time plays many parts,
His acts being seven ages.

From *Othello*

Good name in man and woman, dear my lord,
Is the immediate jewel of their souls;
Who steals my purse steals trash; 'tis something, nothing;
'Twas mine, 'tis his, and has been slave to thousands;
But he that filches from me my good name
Robs me of that which not enriches him
And makes me poor indeed.

From *The Merchant of Venice*

Hath not a Jew eyes?
Hath not a Jew hands, organs, dimensions, senses, affections, passions?
Fed with the same food,
Hurt with the same weapons,
Subject to the same diseases,
Healed by the same means,
Warmed and cooled by the same winter and summer, as a Christian is?

Followed the Piper for their lives^[z].

EXERCISE B

Work with a partner and think of at least ten different categories of things, for example, vehicles, fruits, flowers, items of clothing. Think of related questions to ask each other. Responses should contain at least four plural nouns related to that category.

EXAMPLE A: What **types** of **flowers** do you like?

B: I like yellow **roses**, **tulips**, **daisies**, and **carnations**.
What **types** of **flowers** do YOU like?

A: I like **gardenias**, red **roses**, **lilies**, and **orchids**.

Appendices

Appendix I: To the Teacher

Welcome to the challenge! You recommended *English Pronunciation Made Simple* to your students because you are committed to helping them improve their pronunciation of English. This is a difficult task, but it's *not* impossible. Teaching and learning English pronunciation can be difficult, tedious work. It can also be more fun than you ever imagined possible. (In our accent-reduction classes, there have been countless occasions when we, along with our students, have laughed long and hard enough for tears to roll!)

Some of you are already experienced teachers of English for nonnative speakers or speech instructors and/or speech pathologists involved in teaching foreign-accent-reduction classes, and you already employ a variety of effective techniques with your students. Please: Share some of your most successful ones with us. We invite you to let us know how you like our suggestions. We truly look forward to hearing from you!

Some of you are new at teaching English pronunciation to nonnative speakers. Don't worry. An enthusiastic attitude and genuine desire to learn with your students will be more valuable than years of experience. As you'll quickly realize, the *English Pronunciation Made Simple* program provides you with an easy-to-follow, systematic approach to teaching English pronunciation.

Breaking the Ice

Teaching foreign-accent reduction can and should be fun for all concerned. At first, students will invariably be apprehensive and self-conscious about taking such a course and "exposing" their speech patterns in front of you and their peers. The time you spend trying to alleviate their initial concerns will be time well spent. We recommend that you:

- Use the first class meeting to discuss the positive aspects of "accents" in general. Elaborate on the information presented on page ix in "To the Student."
- Emphasize that accent reduction is not the losing of one's culture or heritage, but the improvement of a skill—such as the ability to play the piano, guitar, or tennis! Our students relate well to such analogies.
- Describe your own embarrassing mistakes or those of other native English speakers when speaking a foreign language. Our students laugh heartily at our examples and are comforted by the thought that we, too, experience pronunciation difficulties when speaking our second language.

Hearing the Sounds

Advise your students that their initial difficulty in hearing the various vowel sounds is perfectly normal. Nonnative speakers of English frequently have difficulty recognizing sounds absent in their native language. (Studies have found that the sound system of one's native language will influence one's perception of English phonemes.) Your students will overcome this initial "deafness" to specific sounds after directed auditory discrimination practice. If possible, ask your school nurse, speech pathologist, or local public health department to administer a quick, routine hearing screening to each of your students. This will dissolve their concerns (and yours) about any possibility of hearing loss.

Accent Analysis

The Accent Analysis should be used at the beginning of the *English Pronunciation Made Simple* program. Record each student (or have them record themselves at home) reading the **Accent Analysis Sentences** (Vowels on page 261 and Consonants on page 264). Each sentence pair is designed to survey the students' pronunciation of a specific target vowel or consonant. Encourage them to read the sentences in a natural, conversational voice. The Accent Analysis should be used again when your students complete the program. This will help you (and them) measure their progress.

Now you are ready to listen to your students' tapes and do a written survey of their pronunciation difficulties with vowels, diphthongs, consonants, and word stress. Use the **Summary of Errors** forms (Vowels form on page 263 and Consonants form on page 267) to record the results. The pairs of Accent Analysis Sentences are numbered to correspond to the phonetic symbols.

As each group of sentences is read, listen only to the pronunciation of the *target* sound. Ignore all other errors. While a student is reading, follow along sentence by sentence on the **Teacher's Record Form** (see pages 262 and 265). Circle all target words that are mispronounced. On the line above the mispronounced target word, record the error. Use any marking (e.g., phonetic symbols) that is meaningful to you. You can then complete the Summary of Errors forms (pages 263 and 267) at your leisure.

For example, your student substitutes [au] (as in *out*) for [ɔ] in sentence 9's target words *author* and *audience*, and [ou] (as in *no*) in *office* and *boring*. You might record the errors as follows:

[au]	_____	[ou]	_____	[au]	_____	[ou]
9. The <u>author</u> gave a long talk in the <u>office</u> . The small <u>audience</u> thought it was <u>boring</u> .						

On the Summary of Errors form, you might make the following notations:

Vowels	Correct	Error	Comments
9. [ɔ] as in <i>all</i>	_____	[au], [ou] for [ɔ]	Errors seem related to spelling patterns.

Other Observations

Using the Manual for Classroom Instruction

Whether you are an instructor of English for speakers of other languages, speech, or accent reduction, or a speech pathologist, you will find *English Pronunciation Made Simple* completely adaptable for classroom or clinical use. The exercises and Check Yourself sections have been tested in the classroom and proven to be effective with nonnative speakers of English striving to improve their American English pronunciation. The manual is so complete that it eliminates the need for you to spend endless hours preparing drill materials. The following are some suggestions to help you use the manual effectively.

- **To the Student:** Read this section first to familiarize yourself with the organization and content of the manual.
- **Sequence of Material Presentation:** The order of sound presentation is flexible. The integrity of the program will remain intact if you assign the lessons in a sequence of your own choosing. Your personal teaching philosophy, available time, and students' specific needs should dictate what you teach first. Many students will not have difficulty with all the sounds. Consequently, you may wish to skip some lessons completely and spend more time on the real "trouble makers" (like [ɪ] as in *it* or [u] as in *cook*)!
- **A Key to Pronouncing the Vowels and Consonants of American English:** These sections introduce the International Phonetic Alphabet. Don't be concerned if you are currently unfamiliar with the phonetic symbols. Each symbol is introduced and explained one at a time. You will learn each one easily and gradually as you progress through the program with your students. Refer back to the Key to Pronouncing the Vowels of American English (page 3) and the Key to Pronouncing the Consonants of American English (page 117) when you need to refresh your memory.
- **Adaptation of Material:** The material presented in each lesson can be adapted easily. If your students require more drill at the sentence level before progressing to dialogues or paragraphs, focus your attention on the appropriate exercises; defer presentation of more difficult activities to a later time.
- **Check Yourself:** The Check Yourself exercises can be used in a variety of ways: (1) You can present the exercises to evaluate your students' progress; (2) you can use them as both pre- and post-tests to more precisely measure students' gains; (3) you can divide your students into teams to complete the exercises as a group rather than individually; or (4) you can assign the exercises as homework to encourage out-of-class practice.
- **More Practice:** These sections have a variety of additional readings and conversational and communicative activities to encourage further practice with the target sound or feature of English pronunciation emphasized in the lesson. The activities can easily be expanded for classroom use. The diversity of these assignments will certainly liven up the regular classroom routine. For example, in lesson 2 on [i] and [ɪ], students are asked to make

several social introductions using phrases pronounced with the target sounds. This activity could be employed in the classroom by having students introduce themselves to each other.

Additional Communicative Practice Activities

As an extra bonus, here are some additional in-class activities to vary your presentation of the material and encourage further communicative practice.

Objective: To increase students' ability to produce the target sound in connected speech.

Activity 1: Have students role-play using the communicative activity at the end of each lesson.

Activity 2: Play a memory game using word lists. Ask one student to complete a sentence with a word containing the target sound. The next student must repeat the sentence and add another word with the target sound.

Example for target consonant [v]: "I'm going on **vacation** and I've packed a **vest, vase, stove, _____, ...**"

Example for target vowel [ɪ]: "I'm going on a **trip** and I will bring a **pin, winter coat, guitar, _____, ...**"

Activity 3: Assign students a topic for a list. List topics might include Grocery List, Laundry List, List of Daily Chores, List of Phone Calls to Make, List of Famous People to Invite to a Party, List of Things to Pack for a Trip. Have them list at least five items loaded with the target sound. When the lists are completed, ask students to share their responses with you and their classmates. You'll be delighted with their creativity.

Example for target consonant [r]: (1) **Remind Florist to Deliver Roses** to Aunt **Roda**, (2) **Grocery Shop for Bread, Oranges, Radishes, Rolls, and Carrots.**

Activity 4: Ask students to write their own personal ads describing their ideal mate. Assign this either for homework or as an in-class activity. They should use as many words with the target sound as possible. Instead of having students read their own "personal ads," collect all of them and redistribute to the class. Each student gets a turn reading one of the ads. In this way, authors remain anonymous!

Example for target consonant [m]: I'm looking for a **manly, muscular male**. He **must** be **smart, handsome**, and like **music**. He should be **multi**-talented and **most important**, be **marriage-minded**.

Activity 5: Ask students to create their own tongue twisters with the target sound in the initial position of words. Encourage them to use the

dictionary to find as many words with the target sound as possible.

Example for target sound [l]: "Large Larry listened as Laura lectured loudly" or "Lovely ladies love lovely lacy lingerie."

Objective: To increase students' ability to correctly pronounce past tense and plural endings.

Activity 1: Play a question-and-answer game using regular present and past tense verbs. Ask one student to respond in a complete sentence to your question; then ask a yes/no question of another student. The next student must respond to the question, pronouncing the verb correctly in the past tense, and ask a question of his or her own.

Example: "When did you stop smoking?" "I **stopped** smoking last year!"

"Did you wash your car today?" "No, I **washed** it yesterday."

Activity 2: Present a variety of 3-verb series aloud. One past tense verb in each series should have a different *-ed* sound than the other two. Ask the students to identify the verb with the different *-ed* sound.

Example: You say **baked, cleaned, cooked**; the students select **cleaned**.

Activity 3: Ask students to prepare a two- to three-minute talk about a personal experience they have had as an adult or child. Encourage them to relate their experiences in a conversational manner and to use as many past tense verbs as possible. Ask the "listeners" to make a list of all the regular past tense verbs used by each speaker. After each presentation, ask for a volunteer to read his or her list aloud, being careful to pronounce the *-ed* endings of the past tense verbs correctly.

Examples of possible experiences:

An Embarrassing Moment	A Sad Experience
A Scary Experience	A Happy Experience
My First Pet	The Time I Was Lost
My First Car	My First Airplane Trip
My Most Memorable Birthday	An Exciting Experience

Activity 4: Play a "bragging" game using various noun categories such as vehicles, foods, items of clothing, types of footwear, school supplies, items of furniture.

Example: One student asks, "What types of **vehicles** do you have?" The second student responds, "I have three **cars**, two **boats**, and four **airplanes**" or "What **vegetables** did you eat?" "I ate two **tomatoes**, three **cucumbers**, and nine **olives**."

Objective: To increase the students' ability to use appropriate American English stress, rhythm, and intonation patterns.

Activity 1: Have students write *wh*-question-and-answer pairs using complete sentences. They should underline the word in the answer that provides the desired information. Have them read their pairs aloud, being sure to emphasize the new information in the answer.

Examples: "What's your favorite fruit?" "Apples are my favorite fruit." "Who will drive you home?" "My sister will drive me home." "Where do you live?" "I live in Miami."

Activity 2: Ask students to work in pairs and to take turns interviewing their assigned partners. Encourage them to learn at least five "tidbits" about each other. Have them share what they learn with the rest of the class. Their goal is to use at least one contraction in each sentence.

Example: Sergio's from Brazil. He'll be here for a year. He's currently looking for a job. He doesn't want to be a busboy, but he'd like to be a waiter.

Activity 3: Ask students to formulate short yes/no questions. Students take turns asking their questions and choosing classmates to answer them. Remind the students to use a rising intonation pattern at the end of the yes/no question, to pause after the *yes* or *no* response, and to end their declarative statement with a falling intonation.

Examples: "Do you like school?" ↗ "Yes →, I like it a lot." ↘
"Will you buy a new dress?" ↗ "No →, I don't have any money." ↘
"Is your friend going to drive you?" ↗ "Yes →, he'll pick me up here." ↘

With all of these suggestions and the activities, your students will be kept occupied and learning throughout the course!

Additional Auditory Discrimination Practice Activities

Here are some additional in-class activities to vary your presentation of the material and further enhance your students' ability to discriminate aurally between correct and incorrect pronunciation patterns.

Objective: To increase students' ability to recognize the target sound aurally.

Activity 1: Read aloud Exercise A words in mixed order. Have students identify the target sound as occurring in either the beginning, middle, or end position.

Activity 2: Read phrase and sentence exercises orally. Have students list all the words containing the target sound.

Objective: To increase students' ability to discriminate between the target sound and his or her error.

- Activity 1:** Use minimal pairs exercises/Check Yourself exercises (for example, Exercise A on page 12). Create word pairs such as *sit-sit* and *seat-sit*. Have students identify the words in each pair as being the *same* or *different*.
- Activity 2:** Read aloud from the minimal pairs/Check Yourself exercises (such as Check Yourself 2 on page 13). Vary the order of the words (*bit, beat; sheep, ship*) or sentences (*Will he leave? Will he live?*). Have students indicate whether they heard the target vowel in the first or second word or sentence.
- Activity 3:** Give a "spelling test." Read individual words from the minimal pairs exercises (such as the exercise on page 33). Have students write the words as you say them (for example, *aid, Ed, add, odd*). This is a sure way to determine if they are hearing the target sound.
- Activity 4:** Read aloud the phrase and sentence exercises (for example, Exercise C on page 49). Alternate between imitating a student's typical error and pronouncing the target sound correctly. ("*Dun't [don't] go.*" or "*Hold the fun [phone].*"). Have students determine whether or not the words in the phrases and sentences have been produced accurately.

Donna: Better yet, if it's a boy, let's call him (Bob) after his (father). If it's a girl, we'll call her (Barbara).

Bob: (Donna), maybe you want to name her (Rhonda) after your (father's) sister. Then, if it's a boy, we can name him (Ron).

Donna: We don't want to forget your mother (Carla). So, let's call him (Carl) if it's a boy.

Bob: I think we ought to (stop). This could go (on) and (on).

Donna: It's (not) really a (problem). Now we have names for our first four (darling) babies.

Mike: I arrived at five forty-five in the morning.

Myra: I'm surprised the airlines have a late night flight.

Mike: If you don't mind, Myra, I think I'll go home and rest for a while. I'm really wiped out!

Myra: Why, Mike, I have a whole night lined up—dining out and going night-clubbing!

Mike: Myra, are you out of your mind?

Myra: I'm only joking. You're going right home. Sleep tight!

I Never Saw a Moor

Emily Dickenson

I never saw a moor

I never saw the sea;

Yet know I how the heather looks,

And what a wave must be.

I never spoke with God,

Nor visited in Heaven;

Yet certain am I of the spot

As if the chart were given.

Linda,

Leon and I had bad luck. Luggage was lost while traveling from La Paz, Bolivia, to Honolulu. Airline personnel were all very helpful. They told Leon they will certainly locate all, eventually, if we're lucky. It looks like the luggage landed in Lima. At least we met lots of lovely people. Also, we could leave on a later flight. I'll telephone with new flight schedule. We should be home for lunch with the family at twelve o'clock. Hopefully, our arrival won't be delayed. Talk to you later. Love you a whole lot. Lou

Robin Hood

The story of Robin Hood has been retold many times. Robin Hood was an outlaw who lived in Sherwood Forest. He lived there with Maid Marion, Friar Tuck, and others. Robin was really a hero rather than a criminal. He robbed the rich and gave to the poor. He was a remarkable marksman with his bow and arrow. The story of Robin Hood has been written about and dramatized since the eleventh century. Robin truly represents a righteous figure opposing cruelty and greed.

The American Cowboy

Americans created the name cowboy for the men who cared for cattle. You might recall the typical singing cowboy in the movies. He was kind, courageous, and good-looking. He always caught the cow, colt, and of course the girl! But the real cowboy was a hard worker who had many difficult tasks. He had to take the cattle to market. These lonely cattle drives took many weeks through rough country. The cowboy had to protect the cattle and keep them from running off. In fact or fiction, the cowboy will continue to be a likeable American character. *Ride 'em cowboy!*

From *As You Like It*

All the world's a stage,
 And all the men and women merely players;
 They have their exits and their entrances;
 And one man in his time plays many parts,
 His acts being seven ages.

From *Othello*

Good name in man and woman, dear my lord,
 Is the immediate jewel of their souls;
 Who steals my purse steals trash; 'tis something, nothing;
 'Twas mine, 'tis his, and has been slave to thousands;
 But he that filches from me my good name
Robs me of that which not enriches him
 And makes me poor indeed.

From *The Merchant of Venice*

Hath not a Jew eyes?
 Hath not a Jew hands, organs, dimensions, senses, affections, passions?
 Fed with the same food,
 Hurt with the same weapons,
 Subject to the same diseases,
 Healed by the same means,
 Warmed and cooled by the same winter and summer, as a Christian is?
